

Cloud Native Azure Services

Accelerate your cloud-native adoption with BoxBoat

Microsoft's investment in the open-source and cloud-native ecosystems are sending strong signals to the market. Kubernetes and other cloud-native tools are democratizing the cloud for the consumer. Azure Kubernetes Service (AKS) and the surrounding platforms such as Azure DevOps and GitHub have enabled companies to securely deliver resilient software faster than ever before.

BOXBOAT SERVICES

- ✓ **Assessments** – Ensure your organization is on the right track and following industry best-practices for Kubernetes and supporting Azure services. Avoid nasty surprises in the future.
- ✓ **Migrations to Kubernetes** – We can help migrate your team's and organization's workloads to AKS, enhance your security, and build a resilient, highly available architecture.
- ✓ **Kubernetes Expertise** – Learn from the Kubernetes experts. Our experienced team can help you design, build, and run your services more effectively.
- ✓ **Training and Enablement** – We have a rich history of providing Kubernetes training using our hands-on learning platform. Learn Docker, Kubernetes, and other cloud native tools.
- ✓ **Enterprise Strategy** – Unsure how Kubernetes fits across your enterprise? We can work together and help you build an extensive roadmap and onboarding plan for the future.
- ✓ **Platform Engineering** – Create a self-service developer platform to empower application teams to focus on creating valuable software without having to be automation experts.

The BoxBoat Approach

BoxBoat understands that every organization has unique requirements, goals, and culture. To achieve success, BoxBoat uses the following engagement structure to rapidly deliver value, empower your teams, and onboard your entire organization.

1. Assessments – BoxBoat will work with your teams to discover your current state, needs, and goals. We will create a plan of action and reference architecture to achieve your objectives.

2. Training – We will help train and empower your teams so they have a complete understanding of the technologies, and can effectively manage your platform long-term.

3. Hands-on Implementation – BoxBoat experts will work to amplify your team's capabilities, execute on your roadmap, and build the reference architecture on your journey to production.

4. Long-Term Enablement – BoxBoat can provide expert guidance and enablement on a long-term basis to ensure that your teams and organization remain agile and secure.
