## SlashNext Secure Phishing Risk Assessment

2

It's as easy as 1, 2, 3...

<section-header><section-header><section-header><section-header><section-header><section-header><section-header><section-header><section-header><section-header><section-header><section-header>

Provide your MS365 Credentials

Authorize SlashNext, using OAuth 2.0, to scan MS365 inboxes.

- MS365 credentials are never shared
- Requires read-only permissions for the purpose of detecting phishing URLs
- All data is encrypted using HTTPs/TLS and scanning takes place in memory and never written to disk

## **Review Results:**

3

- Overall threats
- High risk users
- Detailed forensics
