

Microsoft Information Protection

Better protect your sensitive information—anytime, anywhere.

Microsoft Information Protection helps customer protect their sensitive data – wherever it lives or travels. Microsoft Information Protection enables you to discover, classify and label, protect and monitor sensitive information across a variety of locations including apps, devices, cloud services and on-premises repositories. You can customize your classification and labeling taxonomy to meet your specific needs and apply a range of protection actions to your data based on its sensitivity – such as encryption, access restrictions, or visual markings. Microsoft Information Protection helps you meet your internal security goals and external compliance requirements.

Identify and understand sensitive information across your data landscape

Apply flexible protection policies based on your unique requirements

Extend information protection to 3rd-party apps and services using the multi-platform Microsoft Information Protection SDK, which enables you to integrate labeling and protection experiences into your apps and services

Automatically label & protect IP in shared CAD files using Microsoft Information Protection

CAD files are the primary source for intellectual property of manufacturing companies in industries like automotive, aviation, engineering and high tech. There is a high risk for losing this IP due to the lack of technical enforcement to protect these files whenever engineers work with or share them with suppliers.

HALOCAD automatically applies Microsoft Information Protection labeling and protection to CAD files whenever engineers check them out of secured PLM systems. At the same time, it preserves existing workflows, as it integrates Microsoft Information Protection seamlessly into various CAD applications allowing users to easily open protected files while enforcing users' privileges (e.g. read only). With HALOCAD companies ensure access, forwarding and privilege control for CAD environments as part of their Enterprise Digital Rights Management approach based on Microsoft Information Protection.

CUSTOMER BENEFITS

- Protection of CAD files beyond the IT landscape (SAP/PLM).
- Ensure sensitivity level outside the IT landscape.
- Classification-based automated MIP policy assignment for CAD files throughout the product lifecycle.
- CAD applications cover for AutoDesk - Inventor/AutoCAD, PTC Creo, Siemens NX, Siemens SolidEdge (Planned), Dassault CATIA and SolidWorks (Planned).
- PLM applications coverage for PTC Windchill, Siemens Teamcenter and Dassault Enovia (Planned).
