

# HealthStore®

BridgeHead's HealthStore® is an independent healthcare data repository that helps organizations consolidate, store, protect and access healthcare information that exists outside their EHR.

## Benefits

---

### Reduce Your Security and Legal Risks

Retire vulnerable legacy solutions that pose a higher risk for security threats and data loss. With HealthStore, you can develop a centralized strategy leveraging a secure, modern platform to help preserve valuable data and mitigate risks.

### Manage All Your Medical Images

Provide a single view for all your patient imaging data from radiology, cardiology, the emergency department (ED), ophthalmology, dermatology and any other discipline with medical images, to build independence into your enterprise imaging strategy.

### Provide Better Continuity of Care

Remove data silos by consolidating your patient information and making it easily available to clinicians as part of a 360-degree view of a patient's full medical history.

### Improve Your Clinical Workflow

Reduce the need to log into multiple systems to access the complete patient history. With HealthStore you can access records directly from within your EMR.

### Retire Costly Legacy Applications

Eliminate the costly license and maintenance fees of legacy systems and free up your IT resources to focus on more mission critical projects for your organization.

## HealthStore® in the Cloud

---

HealthStore® in the Cloud takes the strain off your IT organization and provides a flexible and scalable environment for all your archiving needs. BridgeHead's global Cloud solution runs within the secure Microsoft Azure environment and is proactively monitored 24/7/365 to guard against the latest security threats and provide optimal performance. HealthStore® in the Cloud helps set the stage for more robust reporting and better analytics of your valuable healthcare information.

## KEY FEATURES

- ▶ Intuitive user interface
- ▶ Easy web access or accessible directly through the EMR
- ▶ Supports unstructured, DICOM, HL7 & XDS data types
- ▶ Store, view, analyze and export discrete data types
- ▶ User security [LDAP]
- ▶ Full DICOM image viewer
- ▶ Multi-data point search
- ▶ Bulk print
- ▶ Audit trails/logs
- ▶ Data encryption
- ▶ On-site or Cloud deployment

# HealthStore<sup>®</sup> Solutions

**HealthStore<sup>®</sup> Express:** A cost efficient archive solution ideal for decommissioning old, expensive legacy applications. HealthStore Express provides easy centralized access to your healthcare data. It enables HIMs, finance, and HR groups to store, protect and easily access patient and operational records in the form of files or discrete data.

**HealthStore<sup>®</sup> VNA:** A robust Enterprise Imaging solution designed to meet the performance and real-time requirements for consolidating, storing, protecting and viewing medical images. HealthStore VNA supports the workflows for many departments such as radiology, cardiology, dermatology, the emergency department (ED), and even wound care. HealthStore VNA works with many different file types in their native formats, including: DICOM, GIF, JPEG, MPEG, PDF, PNG, and TIFF.

**HealthStore<sup>®</sup> Enterprise:** A real-time clinical records viewing solution that can be an extension to your EHR. During a patient visit, caregivers can access the patient medical history and view previous records, such as: medications, labs, observations, summary reports or images that have not been natively captured by the current EHR. This information can be seamlessly linked in real-time to the EHR, filtered and easily viewed while caring for a patient.

**HealthStore<sup>®</sup> Insight:** A flexible and scalable solution for gaining valuable, patient, clinical, and operational insights through reporting or analysis of your centralized healthcare data.

## Engagement Process

BridgeHead's team of experts can work with you to determine what and how best to consolidate and archive your data. Whether it's medical images, patient medical records, financial statements or human resource information, BridgeHead can help recommend a strategy that's right for your organization.

With over 25 years' experience in data and storage management, BridgeHead Software is trusted by over 1,200 hospitals worldwide.

Today, BridgeHead Software helps healthcare facilities overcome challenges stemming from rising data volumes and increasing storage costs while delivering peace of mind around how to **CONSOLIDATE, STORE, PROTECT** and **SHARE** clinical and administrative information.

BridgeHead's Healthcare Data Management (HDM) solutions are designed to work with any hospital's chosen applications and storage hardware, regardless of vendor, providing greater choice, flexibility and control over the way data is managed, now and in the future.
