

Solution Case Study

CLIENT: UNITED EDUCATORS MANAGEMENT COMPANY
SOLUTION: AZURE ADVANCED NETWORKING

CHALLENGES

- Inconsistent performance between the corporate network and applications in Azure
- Single point of failure for the connection to Azure

SOLUTIONS

- Azure ExpressRoute design and implementation
- Azure private and public peering
- Cisco 4431 ISR router for BGP peering
- Backup site-to-site connection from NGFW to Azure

BUSINESS RESULTS

- Constant experience with applications running in Azure
- Allow for future growth and bandwidth demands
- Redundant connectivity using both Internet and private transport

BUSINESS BACKGROUND

- Founded in 1987
- More than 1,600 members
- Headquartered in Bethesda, Maryland
- Offers stable source of insurance and risk management to educators
- Between 51 - 200 employees
