

# Azure Report Modernization Assessment

In today's data-driven world, having information is not the problem. The problem is getting the data in the format that is usable and utilize the data for actionable insights. With legacy reporting solutions, analyzing data, and delivering reports in a concise, user-friendly format your business needs is challenging. Also, end of software/hardware support, license renewal, and high TCO drive enterprises for cloud migration and modernization.

## 5-Day Report Modernization Assessment

Cambay's report modernization assessment includes a deep technical analysis of your existing BI solutions and the effort required to migrate & modernize your reporting solutions to an Azure-based Platform.

During our **five-day (40 hours) assessment**, we will evaluate your current BI implementation, architecture, reporting solutions and recommend best practices to effectively design, migrate/modernize, and manage your reporting solutions.

## Objectives

- Offline assessment of current reporting solutions, reports (One module with not more than 20 reports), and Architecture.
- Review Azure cloud readiness for existing BI Solution
- TCO Analysis & challenges
- Review Enterprise Data Model
- Prepare cloud BI strategy
- Evaluate and discuss Azure Services architecture, pricing, and licensing

## Deliverables

- Deeper understanding of how to migrate or modernize reporting solution
- Detail Assessment report
- Roadmap for cloud migration and modernization
- Prepare modern data architecture

## WHY CAMBAY

- Microsoft Gold Partner with competency in cloud and analytics
- Leverages together BI capabilities using the Azure data platform to transform your complex data into actionable insights.
- Helping enterprises achieve insight, innovation, and impact through machine learning, predictive analytics, and visual story-telling.

## Cost

**US \$5,000 for Five Day  
Report Modernization  
Assessment**
