

Quick Reference Guide for Time Tracking

Turn Time Into a Strategic Asset With a Time Intelligence Platform

Increase efficiency and profit with Replicon's
Time Tracking for Service Organizations

Achieve a single source of truth for time

Time is the key resource in today's service-oriented economy. Organizations with 5,000 employees have around 10,400,000 project hours available each year, and those with 50,000 employees a massive 104,000,000 project hours! With this much time at your disposal, you need to know exactly how it is being utilized across all your projects so you can give your organization a competitive edge.

Yet many organizations face significant time tracking challenges. Filling out manual timesheets can lead to inaccurate information, and time data is usually collected and stored across different enterprise systems and applications. That can make it difficult to access time data. But with real-time project visibility you can make faster business decisions and uncover profit you didn't know you were missing.

With Replicon you can elevate time into an asset that impacts your bottom line.

Get a unified platform to drive project profitability

The Replicon Time Intelligence Platform provides a unified, secure, scalable, and cloud-based platform for time, project costing, and pay across the entire organization. Global governance is built in, and supports multiple languages, currencies, statutory pay rule compliance, and regional privacy, security and data residency laws. Intelligent automation leverages artificial intelligence and machine learning to deliver 100% accurate, real-time data and create a single source for time.

Better time tracking enables you to streamline processes to drive operational efficiency and productivity, reduce billing cycles and revenue leakage, and improve cash flow and profitability.

Replicon customers report:

100% real-time, accurate data for actionable insights

90% reduction in administrative overheads

10% reduction in revenue and payroll leakage

5-10% increase in utilisation and productivity

Customers also able to see:

Accelerate time to revenue

Creating a single source of truth for project time reduces billing inefficiencies and inaccuracies, and drives greater efficiency and profitability.

Make agile decisions to power growth

Automated time tracking with real-time visibility enables users to respond faster to time data and make more informed decisions.

Achieve global compliance

Built-in pay rules for 250+ jurisdictions in 80+ countries minimizes the compliance burden for organizations.

Quick Reference Guide for Time Tracking

Automatically harvest time data for real-time visibility

The platform's revolutionary capabilities like Zero Touch time capture harvests time data from GPS, calendars, desktops, mobiles, and other applications, providing real-time visibility into all of your project time data.

Improve the employee experience with a modern, mobile interface

Replicon's Time Tracking for Service Organizations provides a modern, intuitive, and friction-free mobile experience that allows employees to capture and submit time smoothly, and managers to approve quickly using smart approvals.

Drive global governance and local optimization

The platform meets all time tracking requirements for projects, costing, billing, pay and absences and has the flexibility to adapt to global organization hierarchies and business processes while supporting all localization needs such as templates, workflows, languages, and currencies.

Ensure global compliance for payroll

The platform comes with built-in compliance and pay rules that enable enterprises to model time-off policies for different countries to comply with local statutory rules and regional business needs.

Integrate time data across your ecosystem

Time Tracking for Service Organizations comes with pre-built connectors to SAP S/4HANA® ERP software and SAP SuccessFactors® solutions to rapidly deliver a modern and secure way to track all time data across your enterprise systems.

Get started quickly with a platform that delivers:

Enhanced configurability and scalability for large enterprises or global businesses for their time tracking needs.

Open APIs and flexibility to adapt to all your time tracking requirements around business processes, workflows, and configurations to ensure rapid deployment.

Pre-built SAP connectors and a fully integrated user experience to navigate and access Replicon Time Tracking without leaving the SAP environment using SAP® Fiori.
