

Spektra Academy – PL-900 – Microsoft Power Platform Fundamentals

Microsoft Power Platform Fundamentals course will help you to learn the business value and product capabilities of Power Platform. Create simple Power Apps, connect data with Common Data Service, build a Power BI Dashboard, automate a process with Power Automate, and build a chatbot with Power Virtual Agents.

The hands-on labs are provided with a ready to use environment along with detailed personalized instructions to learn and complete the exercises to prepare for Microsoft Power platform Fundamentals certification.

PL-900 Spektra Academy packages include access to the environment along with lab instructions for completing the following modules.

The lab environment is available for the specified duration and will be required to complete the labs within the mentioned time. The lab environment can only be activated once.

Spektra Academy PL900 Offerings:
