Crayon Cloud Governance

Crayon — The Software Experts

What is your Cloud Governance strategy?

Cloud governance is the driving of management and optimization of the cloud spend often resulting in lower company costs. It is essential a company with a large cloud spend control and optimize cloud spend fluctuations before they become out of control. Crayon offers strategic advice around optimizing, controlling, and *forecasting cloud spend*.

- Do you have controls in place to manage the commission and decommission of cloud consumption?
- Do you have the ability to visualize your cloud spend and report to executives the who, why, and how much?
- Can you say with certainty that cloud consumption is driving real business value?
- Do you understand fluctuations in your cloud spend?
- Do you have the process to track and if necessary, charge back for cloud consumption?
- Do you have the ability to forecast your cloud spend?
- Are there additional workloads you should migrate to the cloud?

Forecast: Cloudy With a Chance of Governance

EVALUATE	DEVELOP	PERFORM	OPTIMIZE
Review the existing Office 365 and Azure consumption governance process Review the current business requirements for the governance process including forecasting process and capabilities	Develop a comprehensive Cloud Governance plan including KPIs, goals, objectives, and plan to track business units Establish a steering committee with key stakeholders for decision making.	Review changes in consumption with business leads to validate and define the changed systems Perform ongoing reviews of existing workloads to optimize performance and minimize costs	Provide Executive Dashboard detailing cloud consumption, spending trends, and cloud spend forecasting Provide reporting on a monthly basis based on KPI's, goals, objectives, and business requirements.
