

# MODEL9 CLOUD DATA MANAGER FOR MAINFRAME – THE FASTER PATH TO AZURE

## ABOUT MODEL9

Model9 modernizes mainframe data management and business intelligence in enterprises and enables secure integration with Azure’s advanced analytics tools. Model9’s patented software-only technology securely delivers mainframe data to Azure, eliminating costly physical and virtual tape alike and helping customers benefit from cloud economics and accelerate the adoption of hybrid cloud.

## WHAT WE OFFER

Model9 liberates mainframe data so it can be redeployed easily and cost effectively to Azure. Valuable corporate data can now be made available to Azure services and modern and adaptable analytics. Model9 can also be used to reduce or eliminate dependence on tape and virtual tape by moving data to Azure storage.

Model9 helps enterprises reduce costs and gain access to the tools and services available in Azure. Instead of archive data locked in mainframe silos, enterprise data can take advantage of the continuous innovation of Azure and new capabilities in AI, Kubernetes, containers, databases and analytics.

Model9 performs data movement to and from the mainframe running primarily on zIIP engines, slashing MSU costs by up to 90% and using a more efficient extract (from mainframe), load (to Azure) and transform (in Azure) process instead of traditional ETL.

Migration of mainframe data is made feasible and practical through Model9’s Cloud Data Manager for Mainframe, offering enterprises a first giant step toward true modernization.

## WHAT OUR CUSTOMERS ARE SAYING

*“Our experience in working with Model9 was very positive. Their cloud data management solution is an exciting new development in modernizing legacy mainframe storage management.”*

Scott Ellis, SVP Information Systems, America First Credit Union

# MICROSOFT AZURE

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHAT WE OFFER

### BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

### BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

### TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
