

Regain Control Over Cloud Costs

The service is intended for companies that have already migrated their IT solutions to Azure and are now seeking to optimise costs and establish better control over cloud spend. The results are achieved through setting up the missing pieces of Cloud Governance and Monitoring.

What we offer

We know that migrations can be challenging, and you would rather focus on ensuring business continuity than having to optimise your cloud solutions. We have the capacity, capability, and consulting expertise to support you throughout your cloud adoption journey – from start to finish.

Whether you've already noticed cost inefficiencies or aren't sure where to start looking for them, our custom Optimisation Framework allows us to jump in and support your efforts. We can review your cloud landscape to check for minor and major issues or conduct a thorough 360 View audit and detailed recommendations.

We're able to provide recommendations regarding any type of cloud resource – as an outcome, you gain a step-by-step optimisation plan. Depending on your needs and business context, our efforts can address infrastructural, technical, architectural, and even organisational issues.

Based on the agreed optimisation plan, we'll implement the recommended changes in your landscape – setting up all the required facilities that support alerting, monitoring, governance, and security. In the end, you gain a cost-optimised environment with a predictable spend plan and trustworthy monitoring.

Euan Fraser – Director of Business Technology at Edrington

Demonstrating excellent technical and agile skills, and as part of our technology refresh and risk reduction programme, Objectivity have gained my complete trust and respect with their collaborative style and integrity.

Peter R. Smith – Head of Applications at Edrington

In replatforming our core applications, we wanted a partner who offered technical excellence along with sharing our core values where Integrity is key. With proven agile methods, Objectivity have delivered in all counts.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

Why azure

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve. Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers. We embrace open source, drive innovation through collaboration, and contribute back to the community.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud. Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups. With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
