

# Azure Governance and Fundamentals Virtual Workshops

Governance in Azure is a fundamental aspect of Azure Management and refers to the tasks and processes required to maintain your business applications and the resources that support them.

With the VNEXTiQ's Azure Governance & Fundamentals Virtual Workshops you will learn about how Governance in Microsoft Azure looks like as well as how to architect and implement it.

Azure governance creates processes and procedures that address your IT concerns plus any additional requirements that are unique to your company or industry including, but not limited to:

- Microsoft Cloud Adoption Framework for Azure: Define strategy, plan, get ready and adopt.
- Management groups and subscription management
- Naming standards and resource tagging
- RBAC (Role Based Access Controls)
- Azure policies and auditing
- Azure Resource Graph (i.e. resource tracking)
- Networking / Identity controls
- Security configuration, monitoring and alerting
- Azure Cost Management
- Planning for compliance requirements (i.e. custom internal corporate compliance, NIST SP 800-53 R4, PCI-DSS, etc.)
- Azure DevOps
- Resource management and interaction via Azure Portal, Azure CLI, PowerShell
- Meaning and examples of Infrastructure as Code (IaC) and Policy as Code (PaC) using:
  - Azure Blueprints
  - ARM Templates
  - PowerShell
  - Azure CLI / Azure Cloud Shell
  - Terraform

## What are we offering?

VNEXT IQ is a certified Microsoft Gold Partner with extensive experience in Azure Cloud Infrastructure (IaaS) and Platform as a Service (PaaS) implementations and deployments. Our specialist will help you start your Azure journey by offering the workshops below:

2-Hour Virtual Workshop	4-Hour Virtual Workshop
High-level overview of concepts and implementation.	Overview with examples on the Azure Portal and Infrastructure as Code (IaC).
1-Day Virtual Workshop	Customized Virtual Workshops & Assessments
Detailed review with examples via Azure Portal and Infrastructure as Code (IaC) where users can participate with their laptops and Azure accounts with optional learning exercises. Some basic Azure knowledge is required including active Azure accounts if a hands-on-lab (HOL) option is desired.	Continue your Azure's journey with more in-depth virtual workshops and customized assessments from analysis of Azure environment, insights, best practices, detailed documentation, to migration and implementation.
