MURAL

REMOTE COLLABORATION

INCREASE PRODUCTIVITY WHILE SAVING TIME, REDUCING EXPENSES, AND MAINTAINING COMMUNICATION AND COLLABORATION

Remote collaboration occurs across many platforms. As currently constructed, most organizations use a combination of platforms, tools, and integrations to enable remote collaboration for distributed teams across various geographies and time zones. Companies often face challenges managing static documents, maintaining version control, and inspiring creativity and engagement.

Jobs to be Done

Migrate Existing Processes: Migrate existing collaborative processes to be fully remote.

Adapt to New Challenges: Address new collaboration challenges specific to the remote environment.

Build Remote Culture: Create an intentional and strategic framework for remote collaboration.

MURAL's Value

Activate collaboration that unlocks new digital avenues for visual collaboration, asynchronous and synchronous review, and enhanced design flexibility.

Transform the way work is done via training with our customer experience team to get your team working in new ways that support your business.

Create a culture of visual collaboration, participation, and engagement with a coherent and repeatable framework for facilitating remote sessions.
