Retail Crime Intelligence platform

Helping retailers report, solve, and prevent crime.

The problem Auror helps to solve

Retailers lose on average 2% of revenue through theft, wastage, and process error, commonly referred to as “shrink”. Over half of this loss is typically malicious loss, such as shoplifting and internal fraud. Retailers spend a significant amount of capital on technology to try and combat this loss. However, there has been no effective platform to help retailers report, solve and prevent this loss. Until now...

Our competitive advantage

We stop retail crime

Auror customer profile

Target Customers

Auror’s target customers are retailers that reside in Australia, United States, Canada, and the United Kingdom with 100+ stores within a single geography (e.g. USA). Any retail vertical benefits from using Auror and especially retailers in the following verticals:

- Supermarkets
- General Retail
- Home Improvement
- Fuel Sites (non-prepay)

We typically partner with the Loss Prevention / Asset Protection function, who have responsibility to reduce loss. They tend to report to Operations or Finance.

Commercial Offering

Auror is a SaaS offering and provides customers with an annual enterprise license for the service. This price is based on the number of stores and the size of the stores (proxy for loss per store).

- Deal size is typically between $200k and $2m USD per year.
- Average ROI for Customer = 400%+

Current Customers

Auror works with 90% of the Enterprise Retail Market in New Zealand and 3 of the top 5 retailers in Australia. We’re expanding into the US and UK, and are working with the largest retailer in the world.

For more information please contact our Chief Customer and Commercial Officer - Rhod Thomas rhod@auror.co who can provide more information.
