

## Migration of a UEM system

Fast and easy with EBF Onboarder

ublic

Reasons for a migration and challenges of a manual migration

blic

### Reasons for changing the UEM system

#### Further development of technologies

Another UEM system may be better able to meet requirements than the previous one or better interact with other software.

#### Consolidation of systems

Due to acquisitions, various UEM systems may be used in a company, which are to be consolidated.

#### End of Life of UEM systems or products

If UEM systems are no longer supported, it may be necessary to switch to another system – which was the case e.g. for SAP Afaria or Windows 10 Mobile.

Manual migration

Admins need to get all users to migrate — without having information about who migrated

Admins need to configure the new system

Users need to continue and complete the migration

Admins need to develop a guideline and inform all users

The help desk needs to solve problems of end users Users need to follow the instructions and perform the migration

# EBF Onboarder

# Over 1,000,000 devices have already been successfully migrated

— including migration projects with a scope of 500 devices as well as those with a scope of 100,000 devices.

Migration 100,000 devices from VMware
Workspace ONE to Microsoft Intune in just 6
months

"

#### What our customer says

Without EBF Onboarder for Microsoft Intune our migration would not have been the **success** that it was. The product exceeded our expectations, with migration **costs reduced by 90%** and a timeline **reduced to 6 months from our initially planned 18 months**. The feedback from our administrators regarding the product was immediately positive in terms of **usability**, **simplicity and flexibility**. Our users also appreciated the "one-click-experience" without external intervention on their devices.

"
