C.AI Adoption Bot

Empower every employee and your organization to achieve more

C.AI Adoption Bot is an AI-based Microsoft Teams BOT and interacts with each end user individually with focus to help people to increase the usage of Microsoft Teams for digital collaboration and communication and adapt to new ways of work.

Who is C.AI Adoption Bot ?

"We accompanied the rollout of O365 intensively with training and education, but only a fraction of the Microsoft Teams potential is used. How do we reach and empower all colleagues in our company?"

C.AI Adoption Bot helps Microsoft Teams users to build and develop individually relevant tool and work skills in an emphatic and motivating way. Using AI-supported learning methods, the BOT can provide assistance that matches the respective maturity level, individual learning needs and skill level. C.AI Adoption Bot supports employees and companies to become fit for the digital age, for digital collaboration and new work.

Why customers use C.AI Adoption Bot

- To establish new ways of learning - automated, individual, scalable

- Reduce training costs

- Increase the active usage of Microsoft Teams

Why contexxt.ai

"Aligned to the needs of the people we're doing the right things, to make people's lives easier."
By combining the competencies Digital Adoption & Change Management with Advanced Analytics & AI *contexxt.ai* delivers data-driven consulting and support for digitization projects by providing decision-supporting indicators. Hypotheses resulting from human interactions are quantified and qualified with existing data. Maturity model-based indicators, which show current behavior patterns and the degree of change, allows to actively measure the culture of collaboration and communication in companies - an ideal basis for the targeted support of digitization projects.
