

## A Sustainability Intelligence Platform

ESGeo is an integrated software application, based on Microsoft Azure. able to cover the end-to-end process of corporate sustainability, from data collection, included workflows, to report production and KPIs analytics.

> Clear assignment of task and responsibility

Advanced KPI calculation and **ESG** benchmarking

Optimized prebuilt package with integrated standard requirements

Workflows for a transparent. streamlined process

High quality data gathering process with full traceability

Create **sustainability** annual reports, ensuring data consistency

**MEASURE** 

**REPORT** 

**COMPARE** 

**IMPROVE** 

- > Optimize data collection and easily generate any sustainability report, including annual balance report.
- > Increase managers' involvement in achieving Sustainability goals, reducing the risk of ESG controversies.
- > Turn non-financial corporate objectives into an opportunity involving all stakeholders - such as employees, investors, rating agencies and local communities.
- > Identify and measure material ESG issues, comparing your ESG positioning with peers (by rating agencies, pension funds, asset managers, etc.).
