

MegAAOI

We Define Future By AI

Are you looking for a solution to remedy your inspection hassles at your factory?

ABOUT MegAAOI/AIoT Enabled AOI Service:

MegAAOI is a trailblazer in introducing AIoT to AOI industry to improve current inspection performance, explore new AOI applications, and new business model. We introduce a patented AIoT enabled AOI solution by leveraging MSFT Azure to improve AI solution landing speed for those factory owners keen to improve current AVI/AOI inspection performance.

See what customers are saying:

"Many thanks for the professional AOI service of MegAAOI to make our on-fly AOI application from mirage to reality!"

- Ericsson Hsia, Director of R&D Engineering, ACTT

WHAT WE OFFER

Prior to engaging full-scale implementation to improve your inspection performance, the service can provide you with a POC against your AOI application. You can assess how well the AIoT enabled AOI solution, which leveraging Microsoft Azure cloud service, can contribute to your inspection application to facilitate your next move, which is your implementation decision.

At the end of this 8 weeks service, you will get a validated AI model trained by the image data (photo) acquired from your existing AVI or AOI machine.

The AIoT enabled AOI service is a proven solution by top notch semiconductor packaging and tire manufacturing companies, features with MegAAOI's patented applied technology to speed up the cycle time of chronic AI retrain close loops. We are confidence to meet your AOI expectation as well.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
