M365 Maturity Magnifier

Accelerate your M365 adoption with qualified change management techniques.

Employee Engagement Group A division of KiZAN Technologies

The COVID pandemic has rushed organizations to adopt Teams and other M365 communication and collaboration cloud tools without proper preparation and best practices.

Set the right focus with our M365 service maturity magnifier. Our approach is rooted in change management best practices from Microsoft and ProSci. KiZAN will assist you with assessing your current configuration, usage, and productivity, and deliver a change management plan. We will also review security and governance to ensure nothing is overlooked. KiZAN will identify gaps in knowledge and adoption and deliver ongoing training and reinforcement activities for an additional four months.

Optionally, we can prepare Viva Insights for your organization to view company-wide and individual outcomes like resiliency, agility, engagement, and operational effectiveness. Extending your collaboration through Microsoft Teams with Power Platform and app templates is another optional add-on to magnify maturity.

3 Core Services, 2 Optional Services

▶ Readiness and Productivity Assessment

▶ Governance and Security

▶ Reinforcement

▶ Workplace Insights

▶ Teams as a Platform
