Benefits of implementing **Modern Workplace**

Microsoft Exchange email with Certum security certificate

The Microsoft Exchange service with an additional layer securing the correspondence with registered certificates by Certum automates the identity registration process as well as the process of certificates issuance and revocation based on Azure Active Directory.

Effective team communication with **Microsoft Teams**

A tool that unifies the way teams and employees exchange information. Organization of meetings, video conferences, work with document libraries or the possibility of full integration with other Office cloud tools ensure effective communication in teams in every organization.

Uninterrupted work from any place with **Microsoft Virtual Desktop**

We launch and configure virtual working stations in the Azure cloud, providing employees with remote access to company tools and applications. Full integration with Active Directory allows for logging in using organization data. Full security of the processed data is guaranteed by encrypted cloud transmission.

The implementation process is more effective for Organization when Adoption Plan is put into use.

The Plan includes workshops, trainings and methods familiarizing the organization with the newly implemented tools. Using the process, ensures employees apply the tools and services implemented within Modern Workplace in a natural way so it does not interrupt their normal workflow.

Start cooperation with a trusted **Microsoft Partner** in the field of Modern Workplace and start digital transformation of your organization.
