DATA INNOVATION / DATA MODERNISATION
HeroPath DATA PLATFORM MVP

LIXAR
Fuelled by **BDO**

WHAT IS THE VALUE?

To truly be data-driven, you need a cloud-powered, modern data platform that can **ingest** and **transform** your data, turning into meaningful insights with which you can easily **engage**. Our award-winning **Hero**Path platform offers all of these benefits, and more. **Hero**Path is a scalable and flexible, end-to-end, modern data platform, hosted on the Microsoft Azure cloud. Fuelled by best-in-class components, such as Databricks, Synapse, Data Lake, and Power BI, our platform helps you drive Data and AI solutions that allow organizations within any industry to innovate and grow.

HeroPath enables you to:

| Store all data in a single hub

| Lower total cost of ownership

| Scale as required, limitlessly

| Gain insights faster with reliable, high-volume ingestion

| Optimise and increase productivity

| Drive innovation to future-proof your organisation

DELIVERABLES

1. A single centralized hub for up to three sources of data within your organization

2. Tools for compute-intensive data transformations and visualization

3. A pipeline to get production-grade analytics

4. Users set up on storage and compute workspaces ready to take your data strategy to the next level

HOW DOES IT WORK?

Lixar will provision all of the required services to demonstrate the functionality of a working data pipeline. Then, leveraging our **Hero**Path platform, we set up and manage a lightweight and elastic platform that can ingest up to 3 data sources, persist it in raw format, process and curate the ingested data, surface the data, and create a data visualisation.

HeroPath was recently named winner of the 2020 Microsoft Data Platform IMPACT Award. The win celebrates the ways in which our **Hero**Path platform is helping organizations across Canada accelerate their data journeys and highlights the platform's ability to drive real data and real insights.

DATA INNOVATION / DATA MODERNISATION
DATA PLATFORM MVP

LIXAR
Fuelled by **BDO**

DATA SOURCES → DATA FACTORY → DATA LAKE STORE → AZURE SYNAPSE → POWER BI
Ingest → **Transform** → **Engage**

Data Factory extracts the data and loads it to the Data Lake

Incoming data is persisted in the unlimited Data Lake Store

DATABRICKS

Databricks performs all calculations and transformations

Azure Synapse Data Warehouse securely exposes the data to Power BI
