Challenges for a PMO

Become a center of profit, not cost.

Building trust

To favor compromise and the achievement of having things done.

Fight against opposition to change.

Enable the difficult mission of coordinating and controlling the projects of the organization. On top of that, many projects leave large volumes of data, often unstructured data or data with no clear relationship to the quality of the work being delivered. Analyzing this data to make decisions is as important to program and portfolio managers as it is to a general manager. And it's the job of the project office manager to facilitate those decisions.
