Intelligent Insights for Teams Owners

OfficeExpert™ ACE

Teams Client Application

Enable searches for subject matter experts and empower governance for Microsoft Teams

Enterprise organizations want to maximize their investment in Microsoft Teams and need a more effective approach to empower Teams owners and help them manage their team members. **OfficeExpert ACE** (Advanced Client Experience) is a native Teams application that provides detailed information on all Teams sites to their owner, including usage activity for all members, and enables searching for subject matter experts (SME's). If you really want to promote usage adoption to your Teams community and help control Teams sprawl, then OfficeExpert ACE can help.

Our integrated Teams application showcases actionable insights using four main capabilities:

Personal Teams Usage Analytics

Personal Skills Profiler

Skills & Expertise Finder

Collaboration Comparisons by Workload

Enables Teams Governance

Leverage accurate usage statistics to proactively manage your Teams member community and archive inactive Teams when necessary.

Provides Usage Analytics to Owners

Empower Teams owners with detailed usage information from their Teams members to help promote adoption and engage active collaboration.

Empowers Skills & Expertise Search

Quickly find and contact Subject Matter Experts (SME's) in your organization based on their personalized profile information and LinkedIn-style promotions applied by others inside the organization using Teams.
