

# SAP on Azure Advisory Services

S/4HANA on Azure Roadmap

# UNDERSTAND THE COST, VALUE AND IDEAL PATH OF MIGRATING TO SAP S/4HANA ON AZURE

Secure best-in-class advisory, explore the options and define the most suited roadmap to S/4HANA, supported by an assessment of the value and the rough order of magnitude costs involved in migrating and running SAP on Azure

Living in a fast-paced environment doesn't leave much space for trial and error. Organizations need to adapt, optimize and move forward faster today than ever before. With new technologies and offerings being released regularly, leaders who approach technology adoption more strategically are doing financially better with more than twice the revenue growth.

**SoftwareONE's SAP Advisory Services** strives to support existing and new SAP customers benefit from the exceptional value of SAP S/4HANA and the Azure cloud platform. Our complete set of SAP Advisory Services includes different offerings, providing you with a holistic view by covering Business Advisory, Licensing & Commercial Advisory as well as Cloud Architecture and Technical Advisory. This enables a complete assessment of both costs and benefits.

**The trends show that 68% of cloud services today are delivered by Hyperscalers and 72% of SAP customers are planning to deploy S/4HANA in the Cloud. Chances are, your organization is considering migrating to the cloud as well, so it's best to start the preparations early and stay ahead of the competition. SoftwareONE is your trusted partner that can take care of the migration so that you can focus on your core business and move full speed ahead.**

Many companies are considering migrating their SAP landscape to the cloud, but need to navigate through a large number of conversion, licensing and hosting options, that are essential to define the most suitable and cost-effective path forward for their SAP system and their organization.

With the right knowledge and experience you can determine the safest journey for your business taking advantage of the advantages of SAP S/4HANA solution for the Intelligent Enterprise and Azure innovative services.

As part of our holistic SAP on Azure Advisory Services, SoftwareONE's **S/4HANA and Azure Roadmap** will help you define the most suitable roadmap to S/4HANA on Azure as well as understanding the potential benefits and scale of cost for migrating and running SAP on Azure, including how to optimize the SAP licensing.

With that, you will be best equipped to evaluate options and define your roadmap to S/4HANA on Azure, and corresponding value assessment.

## To help you understand how SoftwareONE can support you, here are a few of the steps we take:

- › Review current SAP architecture
- › Define target S/4HANA on Azure architecture
- › Assess migration, conversion and licensing options
- › Define roadmap best aligned with your strategic business objectives
- › Identify the main areas of business benefits from the migration to SAP on Azure and conversion to S/4HANA
- › Help you understand the scale of cost for the migration, conversion and operation of SAP on Azure

**Organizations already know that digital transformation is essential to succeed in the modern business environment. Consumer demands are rapidly shifting, market conditions are constantly changing, and the power of technology is accelerating at an unprecedented rate.**

**There is no better time than now to start your journey to the cloud and to S/4HANA. And the good news is that you don't have to walk alone. SoftwareONE will support you in navigating the digital transformation challenges.**

We help you optimize your journey to S/4HANA on Azure and select the best options in terms of migration, conversion and licensing. With a solid plan, you are ready to start your journey with more visibility on benefits and costs and less surprises and risks.
