

Public Cloud Services

for Microsoft Azure

We operate and optimize your Azure cloud landscape, so you can focus on your core business.

With our Public Cloud Services for Azure, we can help you achieve everything that Public Cloud promises: speed, agility and economic benefits, regardless of whether you're a well-established enterprise or if you were born-in-the-cloud.

Established Enterprise

"We have stability, we need agility..."

We help both clients with;

Speed, Agility and Economic Benefits

Born in the Cloud

"We have agility, we need reliability..."

To enable you to achieve the benefits, we bring reliability, automation, and cloud native skills, with a platform-agnostic perspective. Plus we continually keep up to date with the large variety of services and features released every month by the major public cloud vendors.

Our standardized services have been road-tested and fine-tuned across all industries and business types, giving your organization the results it needs, all whilst maintaining visibility and control.

Underpinning our experience in managing workloads in Azure cloud, we hold many of the highest accreditations for Azure, including the Azure Expert MSP certification and the Cloud Platform Gold Competency.

Business outcome	Benefits
Decrease time to market	Our experience of application transformation, automation and software delivery has helped in a 10x reduction for a major travel and transport client
Continuous optimization (cost, reliability, security, architecture)	Our operational and architectural capabilities have helped an online client achieve a 20% reduction in IT costs whilst transforming the application to be cloud native.
Increased reliability	Our Azure cloud experience has helped a global construction client consolidate its data center and benefit from highly reliable cloud services to transform legacy applications.
Security, compliance and governance in cloud	Our understanding of client specific and regulatory requirements helped a global retail client achieve PCI compliance in 2 months, using only cloud native features, for a critical ecommerce system

“As leading experts in both SAP and Azure cloud, NTT were a natural choice for Hotusa to handle our cloud migration and we are very satisfied with the positive results.”

Llorenç Madurell - CIO Grupo Hotusa

How we deliver

We have a proven journey to the cloud framework which drives repeatable outcomes and supports clients with cloud adoption through 3 main steps: Consulting, Delivery/Migration and Cloud Services. It all starts understanding your business objectives and current technology state. Then, we plan and execute your migration to cloud. Finally, we manage your workloads with an application-centric approach supported by a blend of top commercial tools and own IP to provide a seamless service across the globe, on multiple clouds. Our Cloud Services are based on a continuous cycle of operation and optimization to ensure the best performance with an on-going increase of efficiency and modernization of the platforms and technologies used.
