

Become a master of your cloud domain

CloudM is admin made easy

Developed by CloudM's in-house engineers, experts and enthusiasts, the software comes with over 100 powerful features. All designed to help organizations of every size to unlock the power of Office 365 and G Suite.

So you can master your potential.

Over 100 ultra-powerful features

CloudM's ever-growing list of features can be split into four key 'pillars':

User Lifecycle Management

Seamless onboarding and offboarding, provisioning and deprovisioning, and email signature management. New starters can get to work faster, and you can take control of your license count (and costs!).

Monitor

Intelligent visual reporting shows you up-to-the-minute details about your domain – from login locations to user activity and domain counts. So you can address any security risks, long before they impact your business.

People Finder

Boost collaboration on a global scale with our smart contact directory, user profiles, and search functions. Just search for the skills, contacts and suppliers you need, connect, and collaborate. It's that simple.

Domain Management

Save time by automating the most complex IT admin tasks. Things like role assignment, permissions management, and delegated access just got much easier.

Trusted by thousands of organizations worldwide

100+

ultra-powerful features

3.4 million

users managed

Over 2,000

organizations on board

Round the clock

global support

Empowering your entire organization

Save time. Boost productivity. Improve collaboration. With CloudM, the benefits are universal.

IT Admins

Automate the most complex Office 365 and G Suite admin tasks with custom workflows that are quick and easy to setup.

Whether it's email signature updates or deprovisioning, your most time-consuming jobs will be over in a flash.

Managers

Say goodbye to endless access requests and complex processes. Now, it's all automated according to organizational policy – so you can securely offboard leavers, and get new starters working faster.

End users

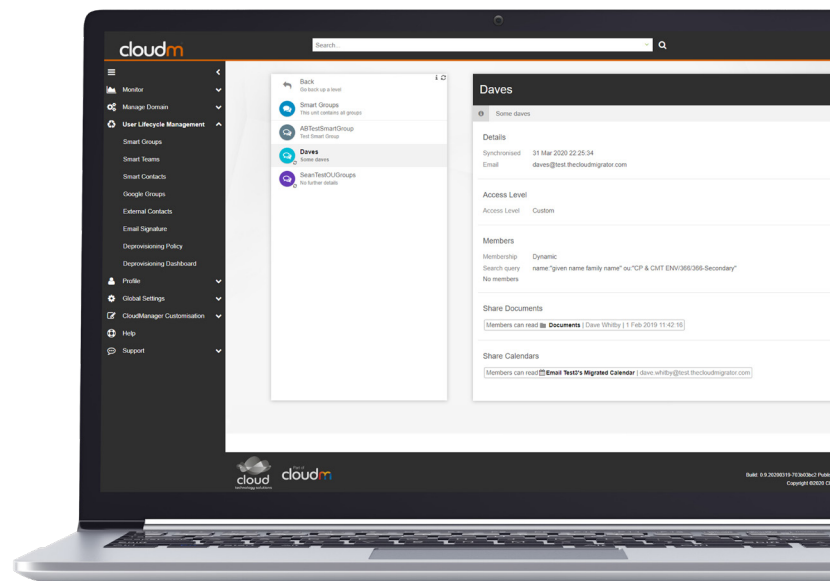

Like being productive? You'll love CloudM. Thanks to smart controls, there's no need to wait for file permissions. Plus, you can easily collaborate with colleagues on the other side of the world.

Don't just take our word for it

"A complete solution to manage groups, password policy and now email signature. A great tool for any admin."

Alessandro Frison, Inbound Marketing Specialist, Mayking SRL, Italy.
