Security Optimization

Key Differentiators

Azure Management Suite (AMS)

AMS provides relevant financial information, best practices to help you improve availability, security, and performance, and reduce costs.

Integration with Financial System

Integration with your financial systems to simplify cost management with chargeback and showback costing

Security Focus

Coretek has a dedicated security practice and builds its solutions on a secure foundation to enhance our customers data protection

Deep Bench of Consultants

We meet the needs of a rapidly changing IT environment by retaining only the best and most experienced consultants with Microsoft Infrastructure Azure expertise

Coretek's Cloud Migration Strategy

Simplified and Proven Processes

01

Assess

- Cloud Economic Assessment
- TCO Value Calculation
- Leverage Data Migration Assistant (DMA) for SQL Modernization Assessment

02

Plan

- Cloud Adoption Framework & Design
- Identify Application Dependencies
- Identify PaaS Potential Workloads
- Build Security Plan

03

Migrate

- Leverage Azure Site Recovery (ASR) for Server Migration
- Leverage Database Migration Service (DMS) for SQL Migration to Azure SQL Database Service
- Build Security Controls

04

Manage

- 24x7x365 Monitoring and Support (with available Microsoft escalation)
- ITIL based Service Delivery
- 30 min Critical SLA
- Azure certified engineers
- Automation/DevOps focus

05

Optimize

- Modernize Applications
- Cost Optimization
- Performance Optimization
- Operationalize Security

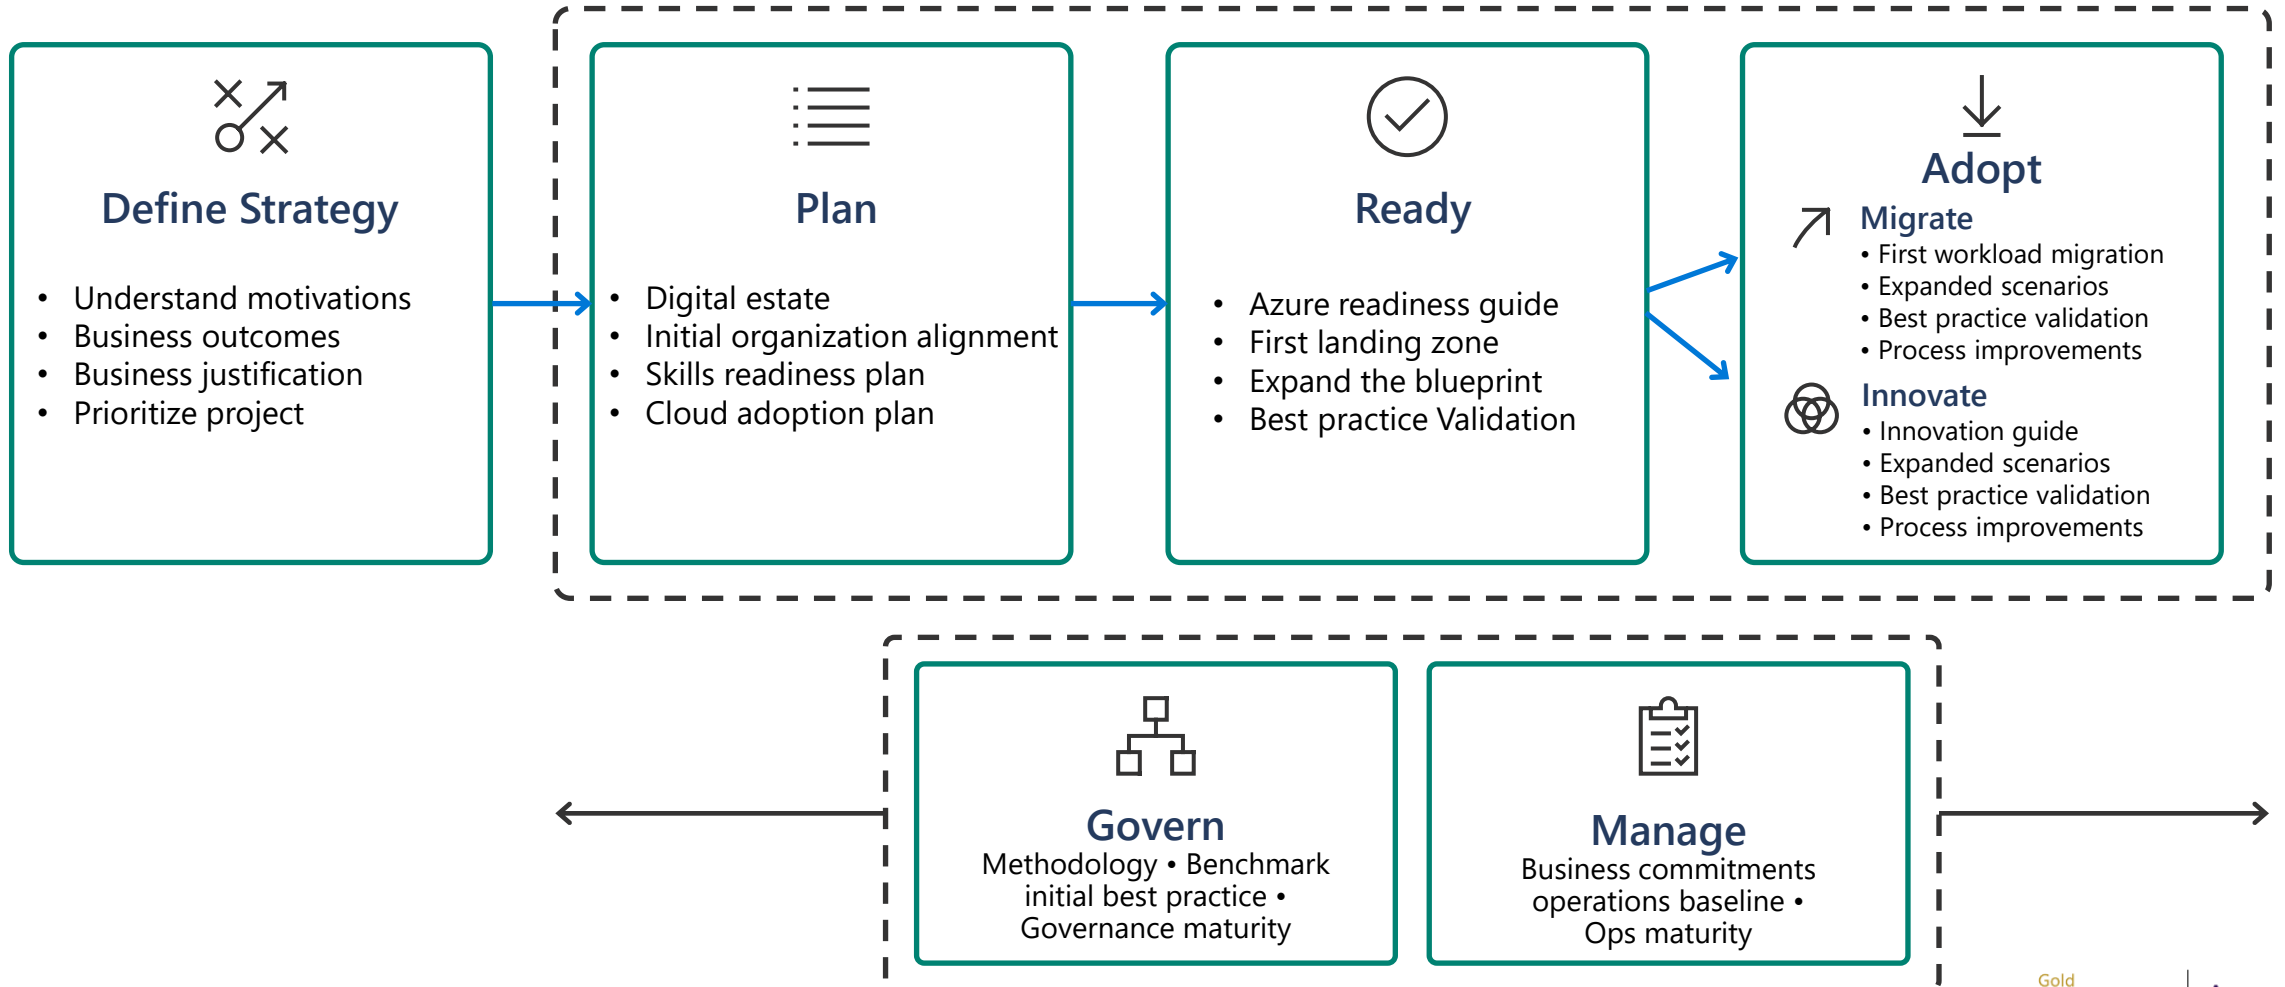

Data Center
Physical, VMware, Hyper-V, or AWS

Cloud Adoption Framework for Azure

Proven guidance to accelerate your cloud adoption journey

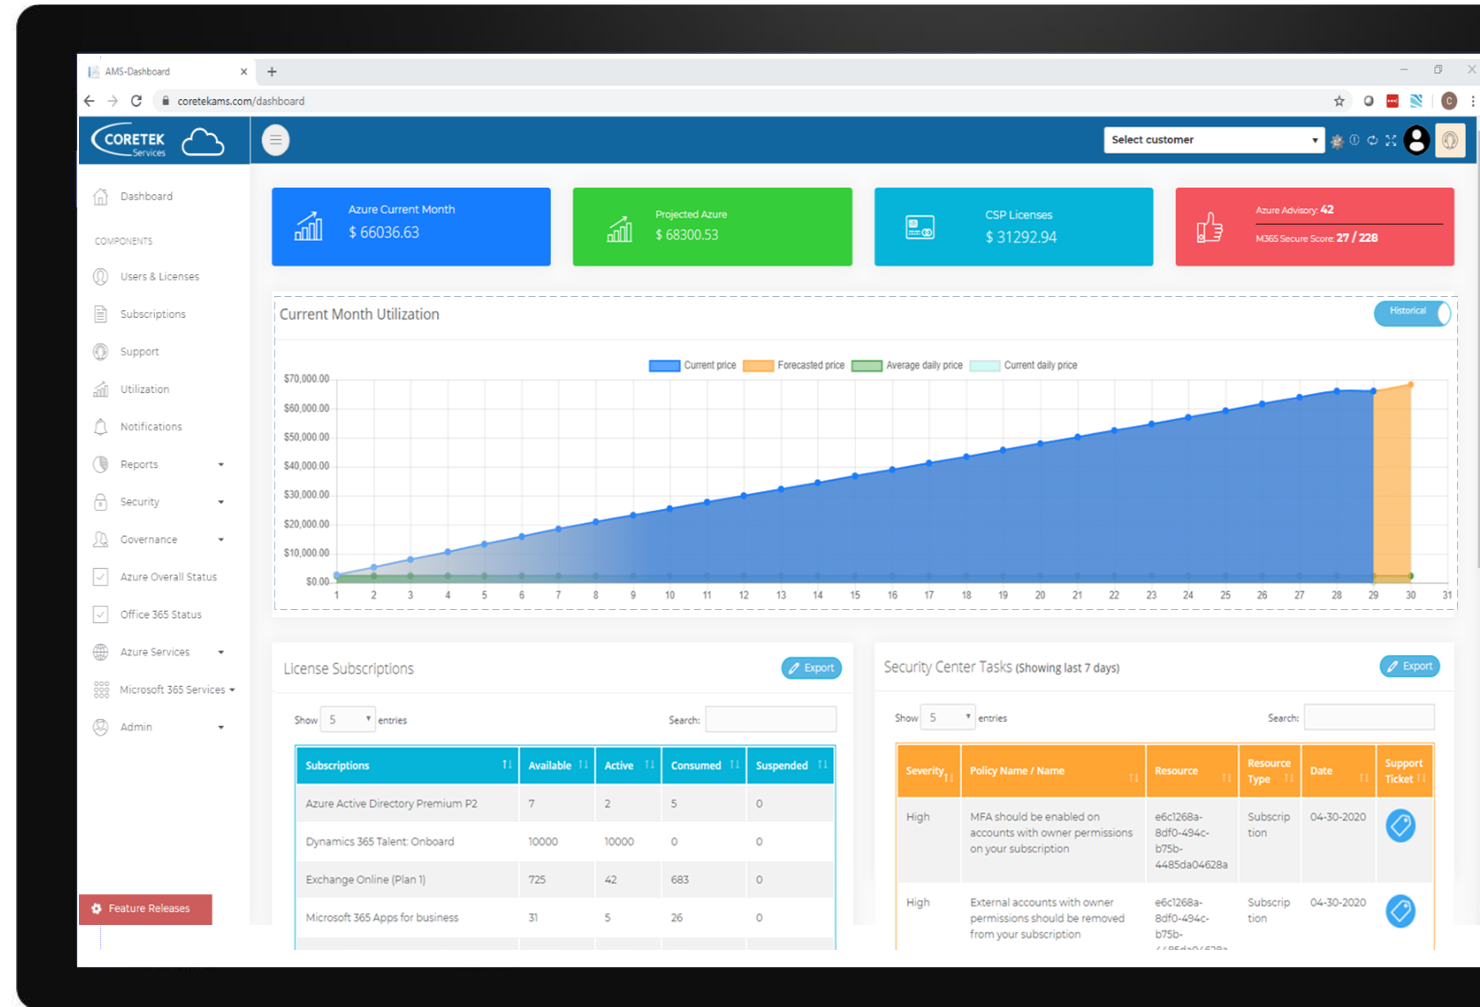

Coretek Azure Management Suite (AMS)

Azure Financial Management, Governance and Automation

AMS provides relevant financial information, best practices to help you improve availability, security, and performance, and reduce costs.

Next Steps

"The project has been a great success. I'd recommend Coretek because of the time and effort they put in to understanding our needs before they ever started working towards a solution. They really made us feel like the solution they were giving us was the one that we needed and the one that was going to work for us."

Dave Barney,
Chief Information Officer, Arhaus
