To compete in this new hybrid world, leaders need to embrace **extreme flexibility** in when, where, and how people work.

And to do that we need a **new operating model.** 

From HR, to IT, to marketing and sales, to manufacturing – every function will need to come together to reimagine how to empower employees, engage customers, optimize operations, and transform products.

A new operating model that looks at three dimensions: People, Places, and Processes to empower employees to thrive in a hybrid world of work.

People	Places	Processes	
Include all employees	Mix of spaces HQ, branch, home, flexible	Transition to digital workflows	
Build resilience			
Wellbeing & connection	Effective workspaces	Personal productivity Frontline worker	
Attracting talent	Move away from city centre	inclusion	
Office to remote office		Team creativity &	
benefits	Home office facilities Costs & Tax	problem solving	
Remote recruitment &	6 H J	Customer + partner	
onboarding	Collaboration across locations	interaction	
Skilling & retraining		Remote team	
Early in career	Collaboration beyond video calls	management & leadership	
Informal networks		Organisational	
		knowledge management	
		management	

## Are you ready for the Hybrid workplace?

Recently Microsoft published its annual <u>Work Trend Index</u>, with findings from a study of more than 30,000 people in 31 countries.

Organisations will be expected to strike a balance to provide employees more flexible remote work and in-person collaboration options. Employees want the best of both worlds, and we are seeing research indicate that most organisations are planning to make that shift.

73% of workers say they want flexible remote work options to stay.

80% of managers say they expect more flexible work from home policies post-pandemic.

of the people we surveyed feel less connected to their colleagues since working remotely more often.

67% of employees tell us they want in-person collaboration with their teams post-pandemic.

# Hybrid meetings are the new normal

Pre-pandemic, people in the office had the advantage.

During the pandemic, the playing field was leveled.

Moving forward, how do we **ensure equal footing** as some join meetings in the office and others remotely?

#### With Microsoft Teams Phone you can:

Integrate calls seamlessly into the flow of work

Meet business needs with unified classic + modern calling features

Optimise IT resources with streamlined set up and management

Provide users with flexible budget conscious devices.

Learn more about Voice and Video Calling in Microsoft Teams here

#### With Microsoft Teams Meetings Rooms you can:

Collaborate without compromise

Reimagine meetings, from the desk to huddle, from the presentation to the webinar

Say no to patchwork solutions that can add complexity and insecurity

Save on overall costs by reducing physical overhead, travel & expenses, and consolidating vendors.
