

SCM Pulse

DLT based SCM solution, records all supply chain related transactions providing end-to-end visibility, transparency and traceability for all relevant parties involved. Aimed at mitigating disputes between participants and eliminating invoice mismatches.

Provenance

Asset traceability provides real time view into asset movement across the value chain

Transparency

DLT connects fragmented sources of data to single network, creating one version of truth

Immutability

Lowered cost of remediation and reduced frauds as data once committed can't be altered

Key Features

E-2-E Material Movement tracking

Process Automation and Document Digitization

Adverse Weather Conditions Alerts

Masterprice List Negotiation & Invoicing

Supplier Performance Scorecard

IoT Enabled Consignment Monitoring**

Simplified Inventory Management

Cloud Agnostic Deployment

Intuitive Dashboards

Smart Contracts
