eDiscovery process flow

About the Service

- Wipro's Microsoft Advanced eDiscovery solution offering enable organizations to rapidly implement eDiscovery processes to manage litigation cases seamlessly.

- Wipro will help setup and configure the eDiscovery workflows, custodians, review sets and advanced content search settings for legal holds to the target locations such as Exchange mail. SharePoint sites, Office 365 group, Teams etc. to optimize the performance of the discovery process and enable seamless end-to-end processes.

- Migrate existing eDiscovery cases into Microsoft Advanced eDiscovery if the existing data format supports.
