

Adatis Rapid Azure Sentinel Deployment

Deploy Azure Sentinel to integrate cyber security within your Azure environment and ensure “security by design “ of your organisation's data.

Microsoft Azure Sentinel delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Azure Sentinel is a scalable, cloud-native Security Information Event Management (SIEM) solution.

Why does Cyber Security Matter?

- Breaches are on the rise as Cybercrime is a profitable business. Every 11 seconds, a business will become a victim of a ransomware attack by the year 2021.
- Cyber attacks are disruptive & expensive. GDPR & DPA 2018 can mean significant fines, in addition a companies reputation can be damaged. Cybercrime will cost the world over \$6 trillion annually by 2021.
- Cyber Risk is at the heart of digital transformation, the new era requires a “Cyber Everywhere” mentality.
- Cyber attackers are sophisticated & well funded with political, ethical or social incentives

Cyber-Security Use Case methodology for Rapid deployment

The Adatis Cyber-Security Use Case methodology maps specific business challenges and compliance requirements, for which you have exposure, to our SIEM and Azure Sentinel best practice library

Reducing Data Ingest

Traditional SIEM mentality is to log everything from everywhere. Only take data from sources required to meet Use Cases including those outside of Azure where required

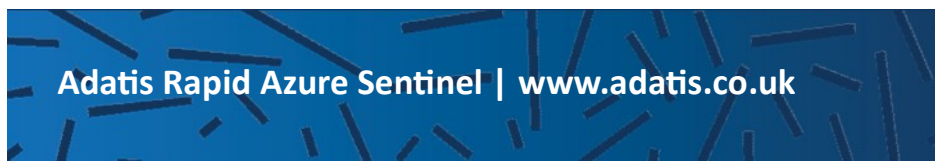

Reducing Cost

By minimising the data sources reduces the data ingestion and in turn reduces the cost

Increasing Speed of ROI

Deploying a cloud native PAYG SIEM and by focusing on the Use Cases with buy-in means an immediate return on investment.

How can Adatis help?

By adopting the Adatis Use Case approach we can help you:

Microsoft Azure Sentinel delivers intelligent security analytics and threat intelligence

Wrap your cyber-security with the Adatis Managed Service for proactive detection and response based on Confidentiality, Integrity and Availability (CIA) principles.

Including a monthly CIA score detailing metrics on:

- Data Protected Actions
- Security Incidents Prevented
- And high-risk employees

Adatis offer professional services specialising in Azure & data analytics, from cloud & data management strategy and consultancy through to world class delivery and managed services. With offices in London, Farnham and Sofia they have been delivering innovative and successful solutions for clients since 2006.

We love helping people unlock the power and value of their data.
