frends

Frends enterprise integration platform as a service is one of the leading Nordic integration platforms. Frends eiPaaS is the next generation of integration, automation and digitalization solution. Truly hybrid, easy to use and affordable, Frends delivers in a fraction of cost and efforts compared to traditional integration solutions.

Tech overview

All Frends solutions have a built-in version control system to track changes to your integrations and manage the life-cycle of existing integrations. We fully support BPA or Business Process Automation, which can be used to create either short or long-running business process automation utilizing the visual BPMN 2.0 based process modeling language. Frends' advanced ready-made capabilities for ETL integration scenarios can process data in almost any format, including JSON, XML, CSV, Flat File, Fixed Width, EDI.

low code

Frend's low-code is more than 10 times more efficient than traditional methods

BPMN 2.0

globally recognised standard

transparency

world class monitoring and API management capabilities

PnP

plug-and-play connectivity to more than 150 systems: commercial, open source, and custom connectors, i.e. to CRM, ERP, Accounting, Big Data, and Analytics systems

Business value

With Frends you will be able to:

- Improve security, and use integrations to monitor and report faults automatically
- Introduce new services and functionalities much faster
- Reduce operational costs in a long run
- Improve internal communications and data exchange for decision-making
- Build Internal Integrations such as between CRM and your services and products
- Build new businesses and partner opportunities with the help and flexibility of APIs and a low-code approach
- Save costs on legacy systems maintenance and reduce tech debt

About us

Frends is currently owned and developed by HiQ, though originally Frends was developed as a productized solution in 1988 for the following Finnish Oil Refinery companies: Neste, Shell and Teboil, which are still Frends customers after 30 years.

- trusted by over 500 customers
- 30 years of operations in the Nordics
- transparent subscription model
