

AzAnchor Azure Landing Zone

Helping your organisation cruise into the Cloud with a battle tested approach.

Ensure a sustainable foundation, structure, governance, architecture, and security for your cloud migration and transformation agenda.

Set up a landing zone

Our solutions are carefully crafted to suit a vast majority of our customer scenarios. We act as your trusted advisor and guide you on the journey to cloud adoption/enhancement, ensuring a smooth transition. Our goal is to set our customers up for the future, in a sustainable manner – so you are migrating and establishing new workloads, and not revisiting technical debt.

AzAnchor is right solution for you if:

- You are planning to move to Microsoft Azure.
- You have moved to Microsoft Azure to support tactical / operational needs and now need to ensure the right foundation is in place prior to exponential growth.
- You have concerns around governance, operations, cost control or transparency.

Greenfield

Cloud-native baseline for initial workloads and simple deployment model.

2 Weeks

Brownfield

Existing Azure deployments looking to introduce stronger governance.

4 - 6 Weeks

Enterprise-scale

Complex enterprise environment poised for long-term self-sufficiency.

10 - 12 Weeks
