2019

PwC IFRS 17 software

IFRS17 Software by PwC – *light, cloud supported and easy to implement*

Key features

- **PVFCF, CSM, RA** calculation covering all methods (GM, VFA, PAA) covering life & non-life insurance
- Advanced analytics: transition impact, P&L reports, disclosures
- Reporting process automation (workflow engine)
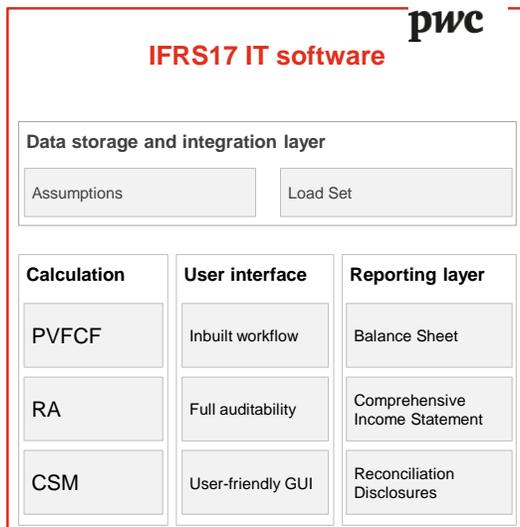

Technical aspects

- Installed on-premise or in cloud
- Scalable architecture Microsoft .NET technology
- Integration with existing source systems (CF, Claims) and output layer (GL, DWH)

Possible use cases

- *„Target"* – customization, integration with client environment
- *„Interim"* – out-of-the-box, SaaS, used in the transition phase
- *„Accelerator"* – validation of other solutions, impact assessment, audit support

Business model

- One PwC team (local office + technology)
- Fee sharing
- Low cost for the client
- Agile delivery
- PoC possibility

IFRS17 IT software

Data storage and integration layer

| Assumptions | Load Set |

Calculation	User interface	Reporting layer
