Brief introduction and overview of services

# Your experts for CPM, BI & Analytics

# drjve – in a nutshell

## PORTFOLIO

---

### Consulting

drjve offers consulting and services in the areas of **analytics**, **business intelligence** and **corporate performance management**. Topics such as predictive forecasting, driver-based planning and data management/-integration are also part of our extensive service portfolio.

### Operations

Competent contact persons are available even after the project has been completed in order to continue supporting you in the operation of your application.

## COMPETENCE

---

### Implementation

Our competence lies in the conception and realization of projects in the areas of planning, forecasting, consolidation and reporting.

### Project management

Our project managers and consultants have many years of experience with **agile** and **classic methods** and concepts.

## MOTIVATION

---

### What drives us

For drjve, **people** are always the focus of attention. The **teamwork of customers** and **employees**, the cooperation and the common achievement of a goal are our greatest motivation.

## TEAM

---

### Staff

With more than **30** experts, drjve started 2019, bringing together over **250** years of consulting and project experience.

### Certifications

Whether **Scrum** or **PMI®**, **CCH®** **Tagetik** or **Microsoft** certifications, our experts are familiar with a wide range of methods and standards.
