10vū™ APPLICATION MODERNIZATION ASSESSMENT

Accelerate your cloud journey with a 10vū™ Application Modernization Assessment. Your customized assessment will provide a PaaS architecture implementation road-map, a high-level application modernization prescription, an application risk/readiness/complexity evaluation, and an associated run and transformation cost estimate. GETTING STARTED

Step 1: Scoping Session

Determine priority applications to evaluate and identify the expected dependencies and business value. Review readiness for PaaS deployments of existing Azure landing zone(s).

Step 2: Data Collection

Data collection is performed with a tool most appropriate for your assessment.
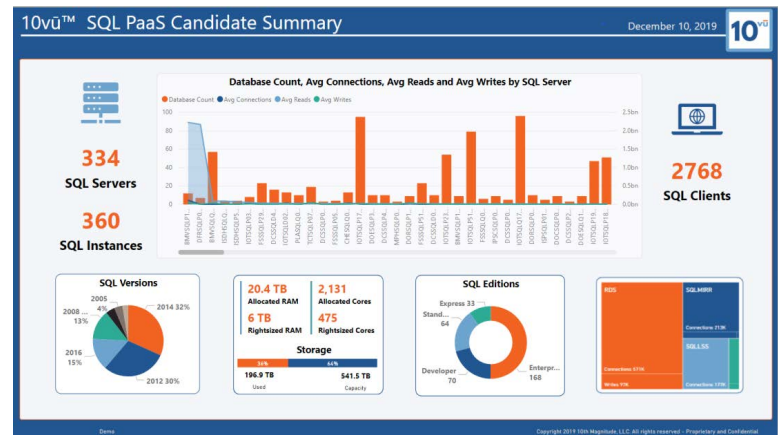

Step 3: Design Sessions

Perform application inventory and identify target PaaS candidates. Explore with application stakeholder(s) the future state options/opportunities and ideal application requirements to most effectively serve the business.

Step 4: Recommendations

Demonstrate potential target Azure architecture(s) for future state and review the high-level application(s), recommended remediation plan, and architecture transformation.

During the Assessment, your 10th Magnitude Cloud Application Architect will leverage 10vū™ for quantitative insight through data collection. This insight coupled with results from the business and operational assessments will lay a foundation for your detailed custom dashboard to support your application modernization.

10th Magnitude's **excellent analytic and visualization processes** helped us understand what needs to be done, and to **feel confident that it can be done.**"

10th Magnitude Client

DELIVERABLES

- Application Readiness Scoring
- PaaS Candidates Portfolio
- Financial & Roadmap Modeling
- Azure Reference Architecture Alignment
- Detailed Action Plan with Recommendations

COST

$15,000

Limited to 3 applications or up to 15 interconnected servers.

Applicable for applications built with Azure-support programming languages.
