Journey to unlock digital innovation

Your data journey to Azure

Seamless, end to end solution | Near-zero downtime | Resilient | Migrate at-scale from multiple sources

Data Platform Modernization

Morkshop

Kickstart your data modernization journey with our workshop

- Walkthrough of the modern Data & Analytics platform capability on Azure
- Understand current data platform
- Explore the data governance & compliance policies that can be achieved on Azure
- Identify 3 scenarios and ideate how the same can be modernized

☆ Design & Plan

Create a design document & migration plan

- Design a reference architecture for the scenarios identified
- Design the Landing Zone to support the data platform on Azure
- Create a migration / implementation approach
- Review the Architecture

Prepare

Setup the cloud environment to enable the modern data platform

- Provision the Landing Zone to support the identified scenarios
- Enable Data governance & compliance policies to ensure a compliant environment
- Identify and enable the automation tooling relevant to kick-start the data platform

Thank You
