

# Azure Security Review

Sirius Computer Solutions

- › Based upon Microsoft Best Patterns and Practices and Sirius' real-world experience with clients
- › Based upon 6 pillars:
  - Availability
  - Scalability
  - Resiliency
  - DevOps
  - Security
  - Management Tools
- › Evaluates architectures and implements designs through remediation that support the 6 pillars

# Azure Security Review Objectives

- › Identify:
  - Usage
  - Workload(s)
  - Current and Future State Requirements
  - Subscriptions
  - Resources
  - Security
  - Governance

# Azure Security Review Next Steps

## › Provide:

- Full analysis, recommendations, and remediation to enable a secure and trusted Azure environment for all current and future workloads
- Remediation includes the following services (not an exhaustive list)
  - Azure Policy
  - Azure Blueprints
  - Azure Security Center
  - Azure Service Health
  - Azure Activity Log
  - Diagnostics and Logging
  - Metrics and Alerting

THANK YOU
