Data Transformation for
Delta Lake on Databricks

Unlock your lakehouse potential with Matillion's cloud–native data integration platform

Actionable insight is only as good as the data it is based on.

Matillion's extract, load and transform (ELT) approach provides an optimal way to build your lakehouse. Get timely access to data; generate insights; and unlock a new world of business opportunities.

**01** Get data into Databricks with speed and efficiency

02 Transform and prepare your data and create multi–use data sets

03 Empower teams across the organization to get more value from the Databricks Lakehouse Platform

---

By 2021, 75% of enterprises will use new, external data sources to enhance their cross–functional decision–making capabilities.*

Use the power of Matillion ETL to:

- Fully leverage your unified data science & BI environment
- Visually design data workflows using Low–code or No–code patterns
- Load, prep, and automate dataset creation in minutes
- Build and deploy a high–performing, secure, cost–effective integrated cloud data platform

---

Increase enterprise data reach
Automate data ingestion workflows from numerous sources into Delta Lake. Overcome the challenges of growing complexity and scale in enterprise data by leveraging inherently secure and modular deployment options, backed by white–glove support.

Enrich your data with transformation
Create instantly shareable datasets for both analytics and data science environments. Visually model complex business logic to prepare data for business intelligence and advanced analytics applications.

Get reliable data with Delta Lake
With a low–code graphical user interface, enable data professionals of all technical abilities to more quickly prepare and cleanse data. Leverage the reliability and performance of Delta Lake through Matillion's tailored push–down architecture..

Generate more value faster with repeatable data ingestion
Spend less time getting the data into Delta Lake and more time focused on improving the value of analytics. Matillion will get the data where needed and ready to use in minutes, not days
