Using the Microsoft 365 roadmap

This guide defines filters on the Microsoft 365 roadmap to help you interpret the data and provides information on how to share, follow, download, and provide feedback.
Overview

With dozens of apps and features, it can be challenging to keep up with what’s new and what’s coming soon.

That’s where the Microsoft 365 roadmap comes in.

The roadmap is the central location for IT professionals, business decision makers, and anyone else who’s interested, to see what’s coming.

It was created to help you plan, communicate changes, and take full advantage of your Microsoft 365 subscription.
Provide feedback

About the roadmap site and content
To provide feedback about the site or existing roadmap items, use the feedback button:

If your feedback is for a specific feature, include the feature ID in your comment.

About future product updates
We have a variety of channels that allow customers to communicate with us. Please note: we will be moving away from UserVoice feedback sites on a product-by-product basis throughout the 2021 calendar year.

Product support
Please contact Microsoft support if you are having technical issues with any Microsoft product.
Find features by typing in a product, keyword, or feature ID into the search bar.

Search tips:
- The best way to find a specific feature is to search by its ID
- Tags can be used in search and are also filter options
- Keywords, such as “modern sites”, that might be found in the description can be used in search
Filters

Selecting filters

Narrow down feature cards by setting filters – Products, Release Phase, Platform, Cloud Instance, New & Updated Features, Status

When a filter is selected, you will see it listed out above the status bar.
Filters

Products
A list of products within Microsoft 365 is provided in alphabetical order.
If multiple products are selected, results will show any features tagged with product 1 OR product 2 and so on.

Platform
Where applicable, features will be tagged with one or more platforms.

Release phase
See resources below for more information about release options.

• Overview of update channels for Microsoft 365 Apps
• Set up the Standard or Targeted release options
• Microsoft Edge Insider Channels
## Filters

### New & Updated Features

Use this filter to see the items that are new to the roadmap OR the items that have been changed, within the last week OR month.

---

#### Cloud instance

Use the cloud instances filter to select your specific environment.

<table>
<thead>
<tr>
<th>Cloud instance</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GCC, GCC High, DoD</td>
<td>Government specific dedicated cloud instances that meet different compliance levels (more info: <a href="#">GCC, GCC High and DoD</a>)</td>
</tr>
<tr>
<td>Germany</td>
<td>Dedicated cloud instance for German customers</td>
</tr>
<tr>
<td>Worldwide (Standard Multi-Tenant)</td>
<td>This is the standard cloud, not restricted to a certain country or to government</td>
</tr>
</tbody>
</table>
Filters

Status

Each feature is assigned a status, which is updated over the lifecycle of the feature.

The statuses of “In development,” “Rolling out,” and “Launched” can be selected above the feature cards. Each card will show a visual representation of its status:

Here’s how we define each of these statuses:

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>In development</td>
<td>The feature is currently in development and testing, and is not available to customers</td>
</tr>
<tr>
<td>Rolling out</td>
<td>The feature is beginning to roll out to the first applicable customers and is not yet available to all applicable customers</td>
</tr>
<tr>
<td>Launched</td>
<td>The feature is available to all applicable customers</td>
</tr>
</tbody>
</table>

The statuses of “In development,” “Rolling out,” and “Launched” can be selected above the feature cards. Each card will show a visual representation of its status:
Sort

Preview or General Availability date
This will be set to General Availability by default

Newest to oldest
This will default newest to oldest
Download

All features
A .csv version of the roadmap is available through the download link in the upper right.

A filtered view
When you apply filters, your download will include only those items.
RSS feed

For entire page
Subscribe to updates for all features on the site, straight to your Outlook or RSS reader.

For a single feature
Click the RSS icon on an individual feature to follow only the updates of that feature.

Follow the directions from your RSS reader to optimize your experience.

More info: What are RSS feeds? | Subscribe to an RSS feed
Share a link

To the entire page
Click the share button to copy the link.

To a filtered view
Apply filters first, then click share.

The link will look something like this:

The link will look something like this:
Email a link

To a single feature
The envelope icon within a specific feature listing will open the mail app with a link to the feature in the body of the mail.
