

Using the Microsoft 365 roadmap

This guide defines filters on the Microsoft 365 roadmap to help you interpret the data and provides information on how to share, follow, download, and provide feedback.

Overview

With dozens of apps and features, it can be challenging to keep up with what's new and what's coming soon.

That's where the Microsoft 365 roadmap comes in.

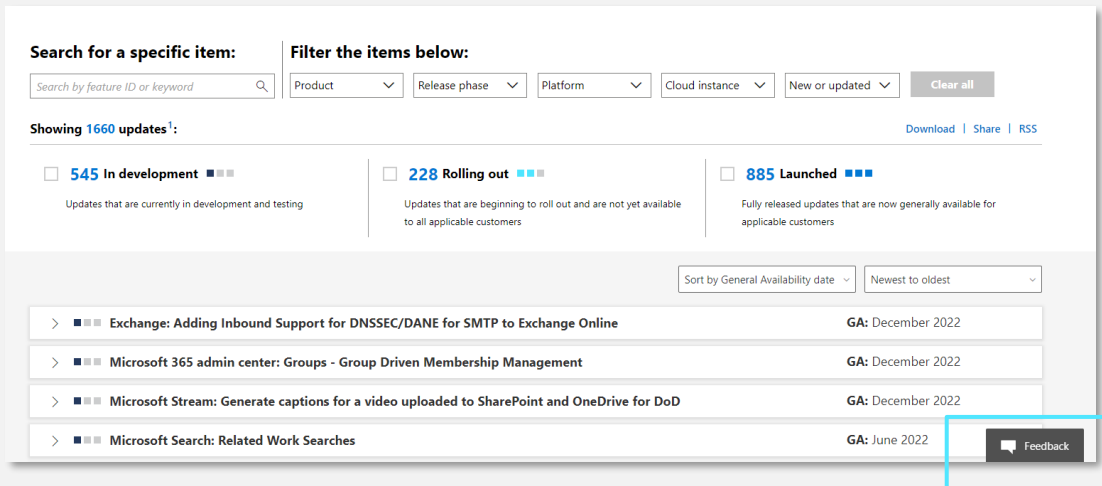

The roadmap is the central location for IT professionals, business decision makers, and anyone else who's interested, to see what's coming.

It was created to help you plan, communicate changes, and take full advantage of your Microsoft 365 subscription.

Provide feedback

About the roadmap site and content

To provide feedback about the site or existing roadmap items, use the feedback button:

The screenshot shows the Microsoft roadmap site interface. At the top, there is a search bar labeled "Search for a specific item:" with a placeholder "Search by feature ID or keyword". To the right, there are filter buttons for "Product", "Release phase", "Platform", "Cloud instance", and "New or updated", along with a "Clear all" button. Below the search bar, it says "Showing 1660 updates!". There are three filter categories: "545 In development", "228 Rolling out", and "885 Launched". Below these, there are sorting options: "Sort by General Availability date" and "Newest to oldest". A list of updates is shown, including "Exchange: Adding Inbound Support for DNSSEC/DANE for SMTP to Exchange Online" (GA: December 2022), "Microsoft 365 admin center: Groups - Group Driven Membership Management" (GA: December 2022), "Microsoft Stream: Generate captions for a video uploaded to SharePoint and OneDrive for DoD" (GA: December 2022), and "Microsoft Search: Related Work Searches" (GA: June 2022). A "Feedback" button is highlighted with a red box at the bottom right of the list.

If your feedback is for a specific feature, include the feature ID in your comment.

About future product updates

We have a variety of channels that allow customers to communicate with us. Please note: we will be moving away from [UserVoice](#) feedback sites on a product-by-product basis throughout the 2021 calendar year.

Product support

Please [contact Microsoft support](#) if you are having technical issues with any Microsoft product.

Search

Find features by typing in a product, keyword, or feature ID into the search bar.

The screenshot displays a search interface with the following elements:

- Search for a specific item:** A search bar containing the text "Search by feature ID or keyword" with a magnifying glass icon.
- Filter the items below:** A row of filter dropdowns: "Product", "Release phase", "Platform", "Cloud instance", and "New or updated", followed by a "Clear all" button.
- Showing 1660 updates¹:** A summary of the search results with links for "Download", "Share", and "RSS".
- Filter categories:** Three filter options with checkboxes and progress indicators:
 - 545 In development** (Progress: 2/4 bars): Updates that are currently in development and testing.
 - 228 Rolling out** (Progress: 3/4 bars): Updates that are beginning to roll out and are not yet available to all applicable customers.
 - 885 Launched** (Progress: 4/4 bars): Fully released updates that are now generally available for applicable customers.
- Sort options:** "Sort by General Availability date" and "Newest to oldest".
- Search Results:**
 - Exchange: Adding Inbound Support for DNSSEC/DANE for SMTP to Exchange Online** (GA: December 2022). Description: "Microsoft is committed to providing world-class email security solutions and the support for the latest Internet standards in order to provide advanced email protection for our customers. With this change we are adding inbound support for DNSSEC/DANE for SMTP to Exchange Online. Look for another roadmap item which covers outbound mail." Feature ID: 63213. Added to roadmap: 4/6/2020. Last modified: 7/12/2021. Product(s): Exchange. Cloud instance(s): Worldwide (Standard Multi-Tenant), GCC High/DoD.
 - Microsoft 365 admin center: Groups - Group Driven Membership Management** (GA: December 2022).
 - Microsoft Stream: Generate captions for a video uploaded to SharePoint and OneDrive for DoD** (GA: December 2022).

Search tips:

- The best way to find a specific feature is to search by its ID
- Tags can be used in search and are also filter options
- Keywords, such as "modern sites", that might be found in the description can be used in search

Filters

Selecting filters

Narrow down feature cards by setting filters – Products, Release Phase, Platform, Cloud Instance, New & Updated Features, Status

When a filter is selected, you will see it listed out above the status bar.

The screenshot displays a user interface for filtering feature updates. It includes a search bar, a filter selection area with dropdown menus for Product, Release phase, Platform, Cloud instance, and New or updated, and a status bar showing the number of updates in different phases: In development (124), Rolling out (61), and Launched (217).

Search for a specific item:
Search by feature ID or keyword

Filter the items below:
Product Release phase Platform Cloud instance New or updated
Clear all

Showing 124 updates¹: In development × Microsoft Teams × Worldwide (Standard Multi-Tenant) × [Download](#) | [Share](#) | [RSS](#)

124 In development ■■■
Updates that are currently in development and testing

61 Rolling out ■■■
Updates that are beginning to roll out and are not yet available to all applicable customers

217 Launched ■■■
Fully released updates that are now generally available for applicable customers

Filters

Products

A list of products within Microsoft 365 is provided in alphabetical order.

If multiple products are selected, results will show any features tagged with product 1 OR product 2 and so on.

Platform

Where applicable, features will be tagged with one or more platforms.

Release phase

See resources below for more information about release options.

- [Overview of update channels for Microsoft 365 Apps](#)
- [Set up the Standard or Targeted release options](#)
- [Microsoft Edge Insider Channels](#)

Filters

Cloud instance

Use the cloud instances filter to select your specific environment.

Cloud instance	Description
GCC, GCC High, DoD	Government specific dedicated cloud instances that meet different compliance levels (more info: GCC , GCC High and DoD)
Germany	Dedicated cloud instance for German customers
Worldwide (Standard Multi-Tenant)	This is the standard cloud, not restricted to a certain country or to government

New & Updated Features

Use this filter to see the items that are new to the roadmap OR the items that have been changed, within the last week OR month.

The image shows a dropdown menu for the 'New or updated' filter. The menu is open, showing four radio button options: 'New within last week', 'New within last month', 'Changed within last week', and 'Changed within last month'. A blue 'Reset' button is located at the bottom of the menu. The 'New or updated' label and an upward arrow are visible at the top of the dropdown.

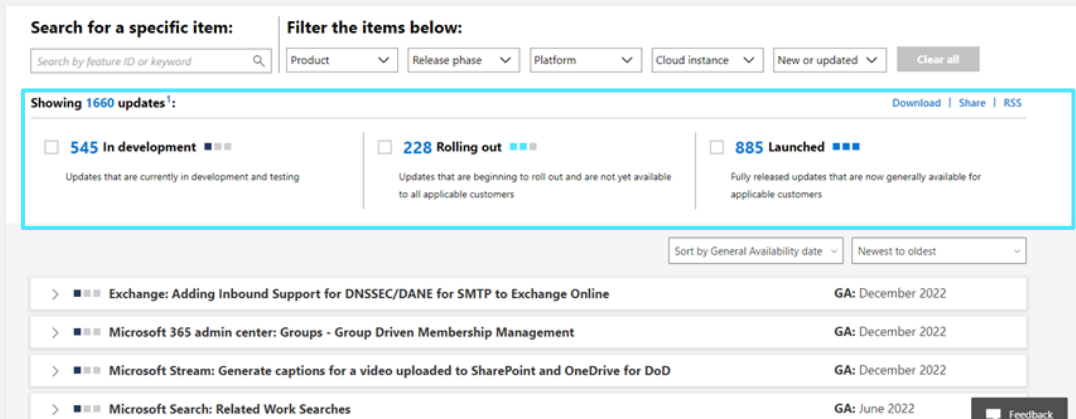

Filters

Status

Each feature is assigned a status, which is updated over the lifecycle of the feature.

The statuses of “In development,” “Rolling out,” and “Launched” can be selected above the feature cards. Each card will show a visual representation of its status: 

Here’s how we define each of these statuses:

The screenshot shows a search and filter interface. At the top, there is a search bar labeled "Search for a specific item:" and a filter section labeled "Filter the items below:". The filter section includes dropdown menus for "Product", "Release phase", "Platform", "Cloud instance", and "New or updated", along with a "Clear all" button. Below the filters, it says "Showing 1660 updates!". There are three status filters: "545 In development" (light blue squares), "228 Rolling out" (medium blue squares), and "885 Launched" (grey squares). Each filter has a brief description: "Updates that are currently in development and testing", "Updates that are beginning to roll out and are not yet available to all applicable customers", and "Fully released updates that are now generally available for applicable customers". Below the filters, there are sorting options: "Sort by General Availability date" and "Newest to oldest". A list of features is shown below, each with a status indicator and a "GA:" date.

Status	Description
In development	The feature is currently in development and testing, and is not available to customers
Rolling out	The feature is beginning to roll out to the <i>first</i> applicable customers and is not yet available to <i>all</i> applicable customers
Launched	The feature is available to all applicable customers

Status

Description

In development

The feature is currently in development and testing, and is not available to customers

Rolling out

The feature is beginning to roll out to the *first* applicable customers and is not yet available to *all* applicable customers

Launched

The feature is available to all applicable customers

Sort

Preview or General Availability date

This will be set to General Availability by default

Newest to oldest

This will default newest to oldest

Filter the items below:

Showing **1660** updates¹: [Download](#) | [Share](#) | [RSS](#)

545 In development ■■■
Updates that are currently in development and testing

228 Rolling out ■■■
Updates that are beginning to roll out and are not yet available to all applicable customers

885 Launched ■■■
Fully released updates that are now generally available for applicable customers

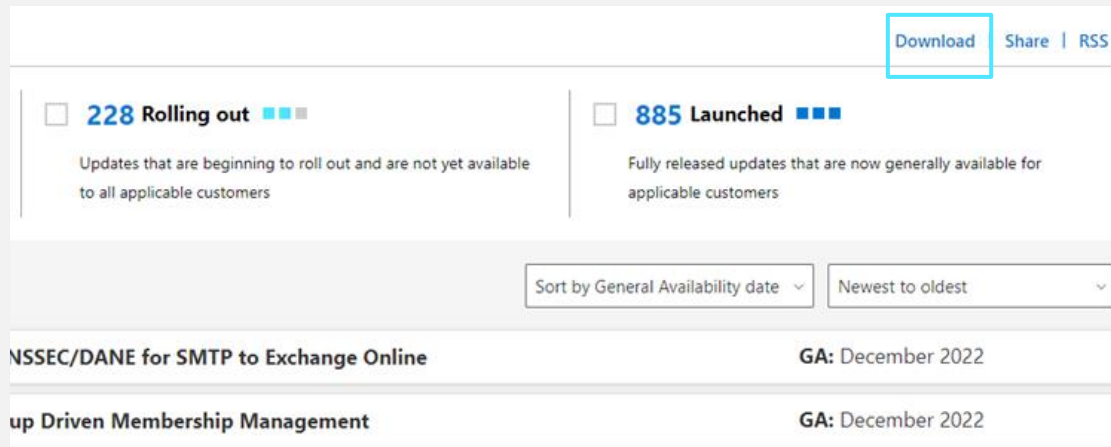

Sort by General Availability date

> ■■■ Exchange: Adding Inbound Support for DNSSEC/DANE for SMTP to Exchange Online **GA:** December 2022

Download

All features

A .csv version of the roadmap is available through the download link in the upper right.

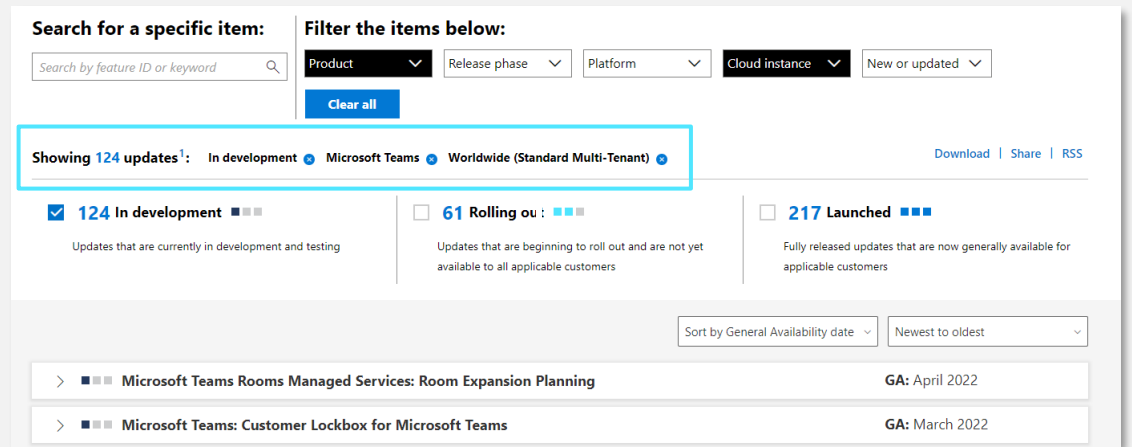

The screenshot shows the Microsoft update roadmap interface. At the top right, there are three links: [Download](#), [Share](#), and [RSS](#). The [Download](#) link is highlighted with a blue box. Below the links, there are two summary cards: **228 Rolling out** (with a progress indicator of 3 out of 4 bars) and **885 Launched** (with a progress indicator of 4 out of 4 bars). Below these cards, there are two dropdown menus for sorting: 'Sort by General Availability date' and 'Newest to oldest'. The main content area shows two update items:

NSSEC/DANE for SMTP to Exchange Online	GA: December 2022
up Driven Membership Management	GA: December 2022

A filtered view

When you apply filters, your download will include only those items.

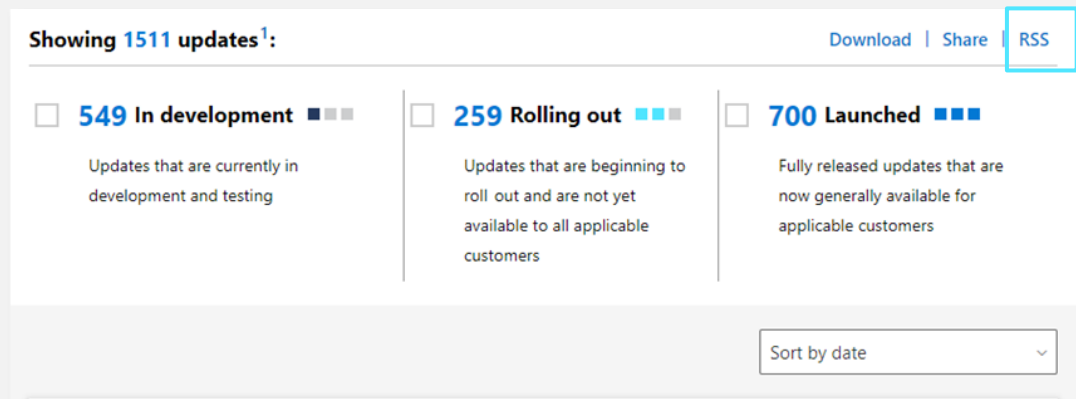

The screenshot shows the Microsoft update roadmap interface with filters applied. At the top, there is a search bar and a 'Filter the items below:' section with several dropdown menus: Product, Release phase, Platform, Cloud instance, and New or updated. A 'Clear all' button is also present. Below the filters, there is a summary bar: **Showing 124 updates!** with active filters for **In development**, **Microsoft Teams**, and **Worldwide (Standard Multi-Tenant)**. The [Download](#), [Share](#), and [RSS](#) links are also present. Below the summary bar, there are three summary cards: **124 In development** (with a progress indicator of 3 out of 4 bars), **61 Rolling out** (with a progress indicator of 3 out of 4 bars), and **217 Launched** (with a progress indicator of 4 out of 4 bars). Below these cards, there are two dropdown menus for sorting: 'Sort by General Availability date' and 'Newest to oldest'. The main content area shows three update items:

> ■■■ Microsoft Teams Rooms Managed Services: Room Expansion Planning	GA: April 2022
> ■■■ Microsoft Teams: Customer Lockbox for Microsoft Teams	GA: March 2022

RSS feed

For entire page

Subscribe to updates for all features on the site, straight to your Outlook or RSS reader.

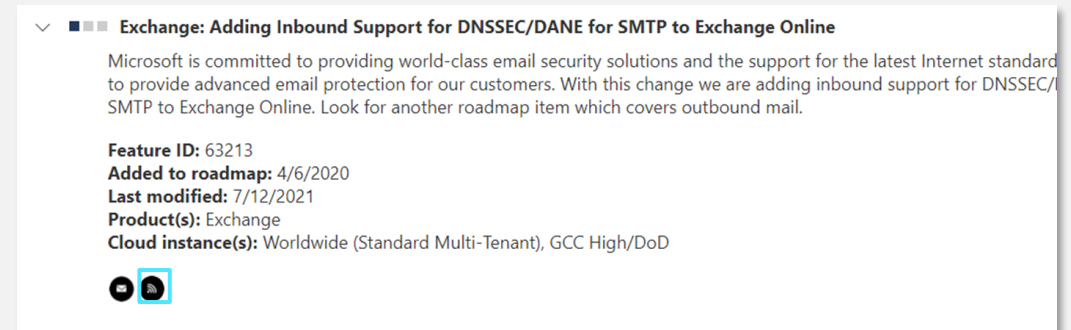

Follow the directions from your RSS reader to optimize your experience.

More info: [What are RSS feeds?](#) | [Subscribe to an RSS feed](#)

For a single feature

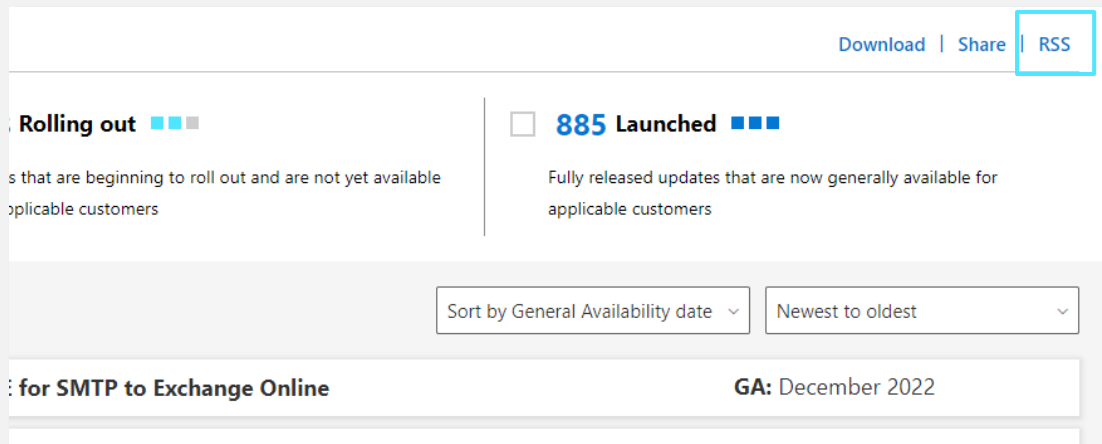

Click the RSS icon on an individual feature to follow only the updates of that feature.

Share a link

To the entire page

Click the share button to copy the link.

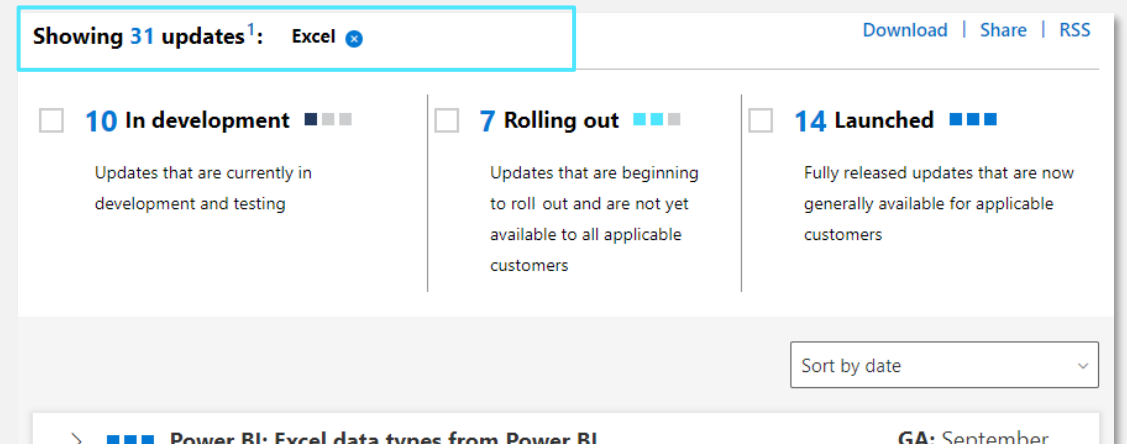

The link will look something like this:

<https://www.microsoft.com/en-us/microsoft-365/roadmap?filters=>

To a filtered view

Apply filters first, then click share.

The link will look something like this:

<https://www.microsoft.com/en-us/microsoft-365/roadmap?filters=Excel>

Email a link

To a single feature

The envelope icon within a specific feature listing will open the mail app with a link to the feature in the body of the mail.

▼ ■■■ **Exchange: Adding Inbound Support for DNSSEC/DANE for SMTP to Exchange Online**

GA: December 2022

Microsoft is committed to providing world-class email security solutions and the support for the latest Internet standards in order to provide advanced email protection for our customers. With this change we are adding inbound support for DNSSEC/DANE for SMTP to Exchange Online. Look for another roadmap item which covers outbound mail.

Feature ID: 63213

Added to roadmap: 4/6/2020

Last modified: 7/12/2021

Product(s): Exchange

Cloud instance(s): Worldwide (Standard Multi-Tenant), GCC High/DoD

> ■■■ **Microsoft 365 admin center: Groups - Group Driven Membership Management**

GA: December 2022

> ■■■ **Microsoft Stream: Generate captions for a video uploaded to SharePoint and OneDrive for DoD**

GA: December 2022
