SIRIUS

AZURE VIRTUAL DESKTOP

Azure® Virtual Desktop (AVD) lets you run Windows® desktops and applications anywhere and on any device, scale quickly to meet changing business needs, and safeguard your sensitive corporate resources to maintain data compliance. We deliver a rich remote user experience similar to applications running on a local PC. And best of all, our AVD offering is smart enough to scale resources intelligently so that you are not over paying! Saving money and increasing efficiency has never been easier.

KEY FEATURES

- **Active provisioning:** Provision a complete IT desktop environment in less than two hours without the involvement of your busy IT resources. Or just call MessageOps and we will do it for you!

- **Centralized management:** A central management portal lets you control all aspects of your desktop environment from a single interface.

- **Cost Savings:** Reduce your VDI costs with efficient Windows 10 multi-session desktops

- **Proactive optimization:** Based on usage, our platform rightsizes your desktop environment proactively to suit your needs, ensuring that you only paying for the performance you need.

- **Amazing user experience:** AVD delivers a beautiful Windows 10 experience and it's super easy to administer as well. Truly the best of both worlds.

- **Microsoft 365® ready:** AVD works seamlessly with Microsoft 365, Azure Active Directory® and ADFS.

- **Integrated:** You have different technologies and applications that make up your environment and we make sure they all work.

- **Client-obsessed help desk:** We support your internal team with our world-class Azure engineers.

- **Enhanced security:** Protect your sensitive corporate data from loss and leaks.

- **Multiple-monitor support:** You can have multiple monitors per workstation.
