The Cloud Optimization Platform Accelerator

Blending optimization expertise with a prebuilt, customizable platform to help you start reducing costs, maximizing performance, and increasing control & compliance in 4 weeks or less

15-40% Average Cost Savings
Providing an actionable optimization roadmap to fit your unique business needs and goals

65% Faster Time to Business Value
Leveraging prebuilt dashboards within your environment to accelerate insights and outcomes

50% Increase in Efficiency
Using automation to continually increase your infrastructure's overall performance

Complete Environment Visibility
Increasing overall awareness to identify trends and remediate abnormalities

100% Free Platform Deployment
Providing the **Neudesic Cloud Control Optimization Dashboard** with any services engagement

The Neudesic Cloud Optimization Platform Accelerator is designed to help your organization easily understand and control your Azure cloud environment to reduce costs, increase performance, and maintain compliance. We leverage our configurable CLOUD CONTROL OPTIMIZATION DASHBOARD to easily automate data and insight collections to provide you with instant and ongoing recommendations for optimization based on your data.

Neudesic's Cloud Optimization Platform Accelerator Includes:

- Metadata driven platform deployment framework
- Pipeline automation
- Prebuilt dashboards/visualizations
- Azure custom workbooks and query templates
- Prebuilt scripts and persona-based access

- CI/CD framework for use case development
- Log analytics workspace, deployment, and configuration
- Automation (IAC / ARM Templates, PowerShell Scripts)
- Resource configurations
- Flexibility adding PaaS services without tool lock-in

About the Neudesic Cloud Control Optimization Dashboard

As part of the accelerator, Neudesic's Cloud Control Optimization Dashboard allows your organization to have complete, always-on visibility into your cloud environment. It provides you with the tools you need to monitor, manage, and optimize your environment by equipping you to understand and analyze budgets, cloud costs, resource allocation, and ongoing recommendations for optimization.
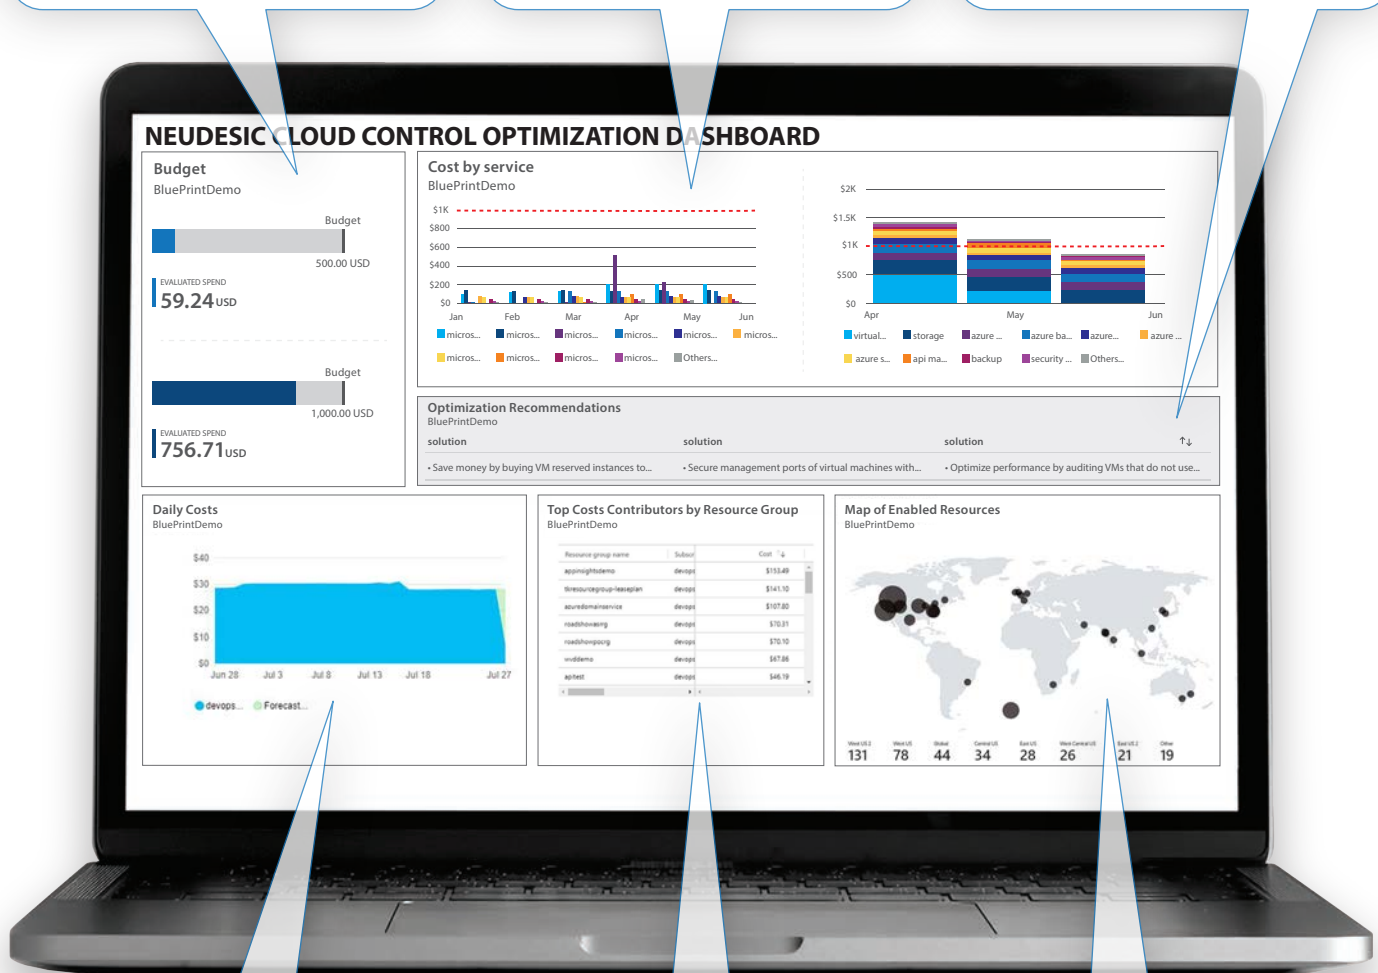

MONITOR BUDGET ALLOCATION
Oversee infrastructure expenses to allocate budgets for projects, identify areas for rework, and determine which instances can be shut down or reserved.

EVALUATE TRENDS & COSTS BY SERVICE
Gain full visibility into your organization's monthly cloud costs broken down by each Azure service to determine any anomalies in your environment.

SURFACE INSIGHTS TO GUIDE OPTIMIZATION
Gain instant recommendations to help your organization reduce costs, maintain security, and optimize performance.

ANALYZE DAILY EXPENSES
Gain expansive daily visibility that allows you to monitor, remediate, and reallocate resources to ensure your environment is fully optimized.

EXAMINE COSTS BY RESOURCE GROUP
Understand your top cost contributors to target which resource groups can be reduced in cost to ensure you are aligned with the overall budget trends.

OVERSEE RESOURCE ALLOCATION
Monitor the global connectivity of your Azure deployments to ensure complete control and compliance with international regulations.
