

Implement Microsoft Teams in 90 Days

There is no better time to make the move to Microsoft Teams.

From developing an implementation strategy to onboarding end users, Core BTS can help you accelerate your Microsoft Teams journey and bridge the gap between people, processes, and technology.

Whether you are new to collaboration tools or need to transition off a competitive product, we can help you deploy and adopt Microsoft Teams in as little as 90 days.

We have the expertise to deliver.

We are proud to carry a Microsoft Advanced Specialization in Adoption & Change Management as well as a Microsoft Advanced Specialization in Teamwork Deployment.

Not only do these specializations demonstrate our knowledge of the Teams platform, but our ability to implement Microsoft-centric solutions in a way that creates incremental value.
