

Predictive Analytics as a Managed Service

AI, Machine Learning

“Data Is The New Oil!”

Data is one of the most valuable assets in a company.

No matter what industry you are in — be it eCommerce, manufacturing, healthcare, retail, financial, agriculture, or hospitality — you have been collecting vast amounts of data from daily operations in every department.

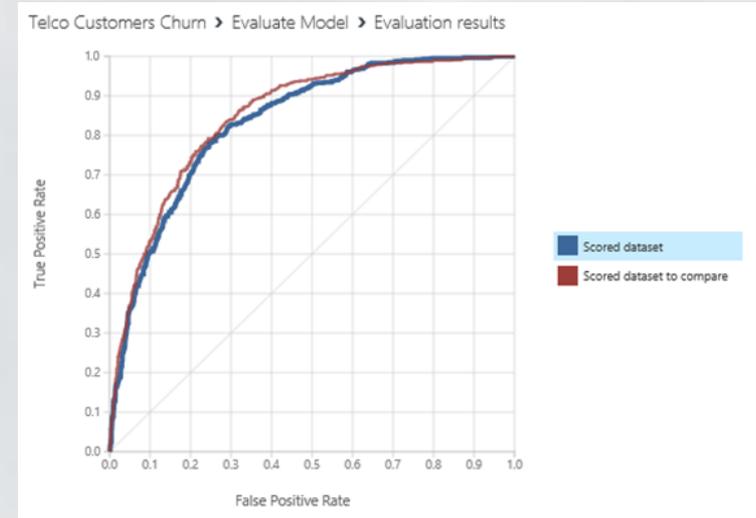

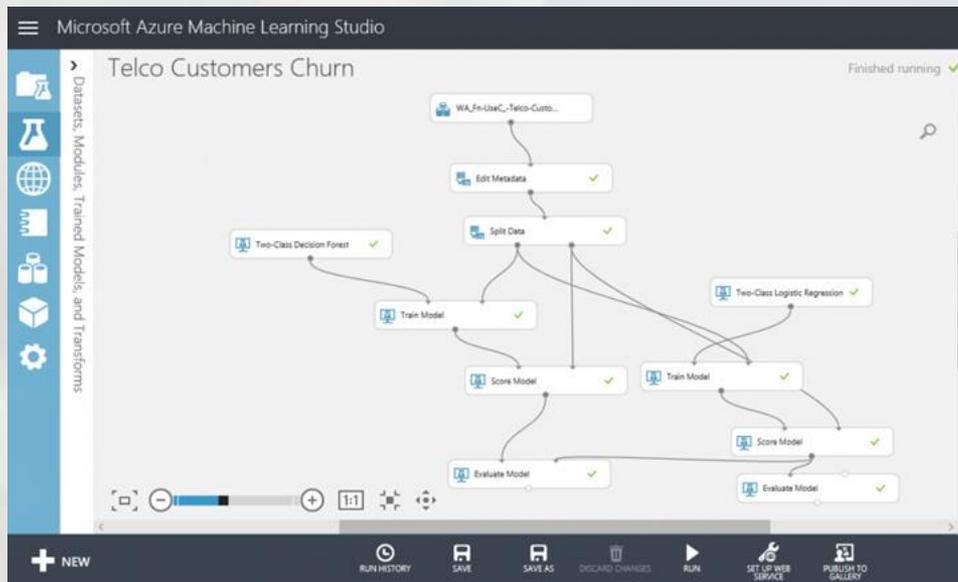

So how can you harness this data to make better decisions and improve business performance?

Predictive Analytics as a Managed Service

AI, Machine Learning

Quadbase Systems can help you move beyond traditional BI tools and Excel to harness actionable predictive insights in a cost effective and timely manner — **WITHOUT** the need for teams of data scientists and IT resources.

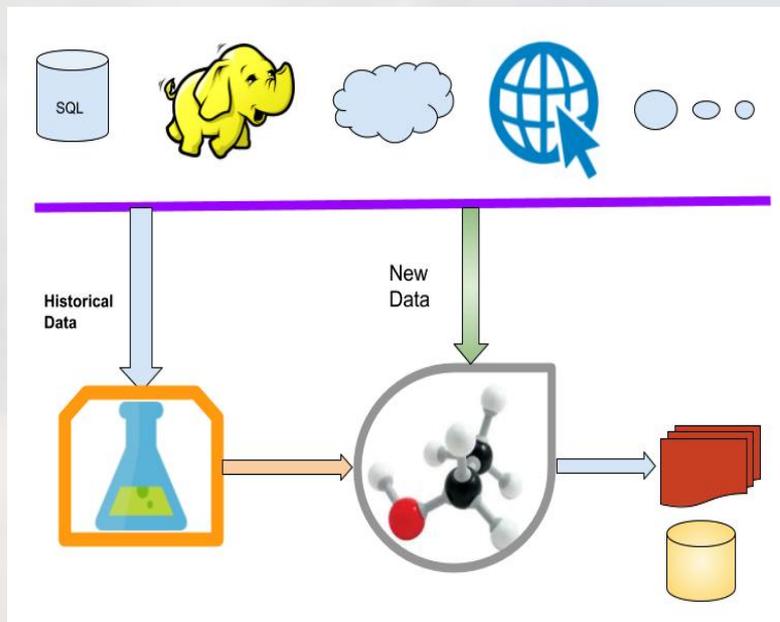

Through our *Predictive Analytics* service, you can use your data to gain a competitive edge with predictive analytics in all areas, including sales, marketing, manufacturing, inventory management, human resource, financial forecast, web analytics, retail, computer vision, and more.

Predictive Analytics as a Managed Service

AI, Machine Learning

Quadbase can help you achieve your goals by:

- Working with your team on defining the use cases.
- Collecting sample data for preparing and building predictive models.
- Deploying the models in the Cloud, with pre-built reports, dashboards, alerts, and various visual analytics on newly collected data.

We are on hand every step of the way to make sure you get the results that you desire.

We periodically review the models, analyze new data, and refine parameters or models when necessary so that you get the best actionable results.

Predictive Analytics as a Managed Service

AI, Machine Learning

Key Benefits

- Low up-front costs
- Risk-free proof of concept
- Bespoke service that meets your requirements
- Fraction of cost compared to hiring a team of data scientists
- Ability to increase profits while lowering costs
- Unprecedented ROI
