

Hybrid Cloud (Azure Arc)

Extend Azure management and services anywhere

Single control plane with Azure Arc

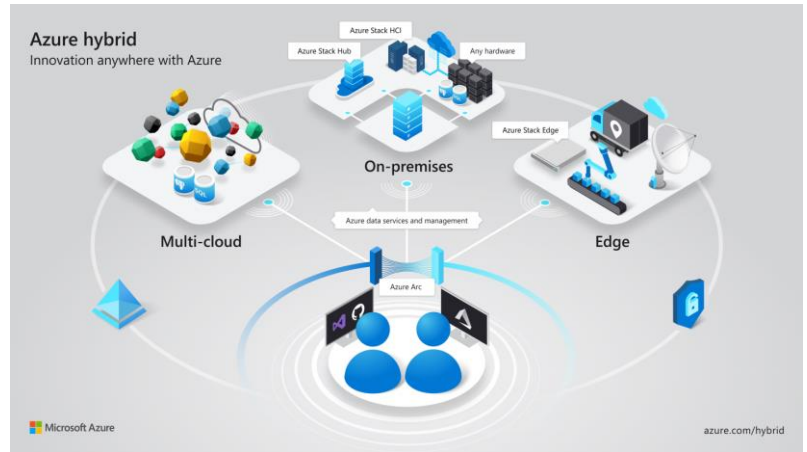

About Azure Arc

Azure Arc eliminates the nightmare to manage, monitor and govern continuously growing and shrinking organizations across premises, cloud or multi-cloud. Be it development environments, testing environments, or full-blown production environments running on Azure cloud, on-premises (ESXi / Hyper-V or standalone bare-metal servers).

Beside this, you also have monitoring and deployment capabilities such as leveraging GitOps to deploy an application from GitHub to a Kubernetes cluster, all inside of Azure Arc.

In a nutshell, Azure Arc allows you to centrally manage all types of environments, not just cloud.

Azure Arc Scenarios

- ✓ Organize and govern across environments - *Unified Operations for Hybrid Cloud*
- ✓ At-scale Kubernetes app management – *Cloud Native*
- ✓ Run data services anywhere – *Azure Data Services*

Leverage LiveRoute's experience, expertise to accelerate implementation or migration starting from assessment, planning, designing, migrating, optimizing, service transition to managed services.

Deliver value to business with quick wins

Gain central visibility, operations, and compliance

Build Cloud native apps anywhere, at scale

Run Azure (data) services anywhere

LiveRoute offer end to end services to help organizations implementing and migrating to Microsoft Azure and have Single control plane with Azure Arc

Our FREE Offer for you:

One day workshop to help you explore Microsoft Azure Arc solution for your hybrid & Multi-cloud environment.

In this workshop, we will present and brainstorm with you:

- ✓ Introduction to Cloud Hybrid (Azure Arc)
- ✓ How to govern and operate across disparate environments
- ✓ How to ensure security across the entire organization
- ✓ How to best enable innovation and developer agility
- ✓ How to meet regulatory requirements and overcome technical hurdles
- ✓ Azure Arc sizing and pricing models
- ✓ Quick assessment of existing digital state, readiness and requirements gap analysis.
- ✓ Build a roadmap covering:
 - ✓ Best fit use-case for your organizations
 - ✓ Recommendations and considerations
 - ✓ Define High level implementation / enhancement strategy
 - ✓ High level requirements
- ✓ Recommend next steps

Why LiveRoute?

LiveRoute, a Midis (MDS) Group company, is a Microsoft Gold Partner and one of the first 100% cloud-based companies in UAE and have been successfully serving our clients since 2008. LiveRoute provide end-to-end services across Microsoft Cloud and on-premises starting from new deployment, to 24/7 support and managed services. LiveRoute help customer reduce costs, increase efficiency, productivity and in effectively strengthening their workplace productivity.
