

Digital identity

Unlock a smarter business with a verified digital identity

A digital ID for all your clients, imagine that! The right data, a securely login, an approved transaction or a document signed in the blink of an eye. Safely and quickly.

Improve the digital experience of your clients and integrate itsme® to your website or app.

What does itsme® mean for your business?

itsme® has developed 4 strong enablers to digitise or optimise every process where **identification, authentication, confirmation** and/or **signing** is key.

Our services are compliant with GDPR, AML/FATF, PSD2. itsme® is ISO27001-certified, an eIDAS' Qualified Trust Service Providers and recognised at Level of Assurance "high" for identity and offers a Qualified Electronic Signature.

Our customers use itsme® to

- **identify** their (new) clients and access their verified data in an onboarding (KYC) process or to prefill forms
- provide their clients with a secure **login** without using 2FA, hardware tokens or smartcards
- collect the **consent** of their clients to share or access their personal data
- receive a **confirmation** of their client for a payment, an order, a subscription, etc
