

# Microsoft Teams for frontline – Change management support

#### What's it about?

It's widely recognised that frontline staff are the backbone for many businesses. They're the face of your business, engaging with customers and representing your companies' values and brand.

With new capabilities available in M365, more businesses are turning to M365 to empower, engage and connect with their people. To help you on this journey, Engage Squared can partner with you to:

### Identify & map use cases for M365

We'll seek to understand current pain points, map out your 'as is' and 'to be' state, review your existing technical landscape and formulate a plan to help you design and implement a priority use case to your frontline staff.

## Develop a proof-of-concept solution

Our technical consultants will use the insights gathered during our discovery phase to build a proofof-concept for one priority use case. This will include a solution blueprint, hi-fidelity design mock-ups and technical specification.

#### Deliver a pilot and broadscale change program

Once the solution is ready, we'll deliver a targeted pilot program, to collect feedback and iterate the solution. Learnings will be used to support a broad-scale launch campaign across your business.

"Working with Engage
Squared as our partner,
we've really felt like they're
our trusted advisors – and I
don't think we would have
got to that level of
adoption, and training, and
support without Engage
Squared being there on that
journey with us. Especially
during Covid-19"

Dee Eldridge, Digital Workplace Manager, Bupa

### **Expected outcomes**

- Enhanced peer-to-peer communication enabling staff to chat directly with each other, eliminating the need for shadow IT
- Two-way leader communication helping leaders to land messages directly in the palm of staff
- Integrated experience paging the way for you to create tailored experiences by linking to other commonly used systems
