

MANAGED AZURE SERVICES

Our team of deeply technical Azure consultants and engineers help you manage your most complex infrastructure and applications with end-to-end, smart, secure, and custom solutions. We work with you to define your Azure management needs based on your business needs.

Take Control of Your Azure Environment

Coretek empowers ambitious businesses to achieve fearless growth by adopting the cloud to reap its benefits. As an Azure Expert MSP, we can do so much more for you than the average managed services provider. No matter your business needs, our team has probably already done it a time or two. We provide managed support at the speed your business demands.

- » Scale your applications to support changing environments
- » Datacenter Exit
- » Mergers, acquisition, or divestiture
- » Reductions in capital expenses
- » End of support for mission-critical technologies
- » Regulatory compliance, data sovereignty requirements
- » Reduce disruptions and improve IT stability

BUILT ON WORLD CLASS TECHNOLOGY By World Class Engineers

Better Service

Coretek leverages machine learning and automation to uncover insights from your data to help you make better decisions, operationalize analytics, and address increasing customer needs. Through Azure Synapse Analytics, we bring together data integration, enterprise data warehousing, and big data analytics into a unified experience.

Better Offerings

Our experts are versed in Azure, so no matter your business needs, we deliver. Whether you need to enable a better remote work experience or migrate your apps while ensuring security and compliance. We've got it covered.

Better Partnerships

Our long-standing and trusted partnership with Microsoft is even stronger due to our Azure Expert MSP standing. Our ties with partner and technical teams give us first-to-market information that enables us to build the best future-ready solutions for your business.

Azure Management Suite by Coretek

Our custom Azure Managed Support allows you to get more out of your IT investments by enrolling your environments in our Azure Management Suite (AMS). This powerful tool provides a window for your cloud environment, including financial and best practices insights that empower you to make informed decisions about your cloud infrastructure availability, security, and performance needs.
