SMART BUILDING SURVEY

Structures that employ automation to regulate functions such as heating, lighting, and security, among others, are known as smart buildings. Sensors are used in buildings to gather data and manage it per business operations and services. It assists facility managers improve the building's reliability and performance, including lowering energy consumption, maximizing space use, and improving the overall user experience. The good news is that old structures are transformable into smart structures by incorporating a wide range of services.

Kindly take the survey which has few questionnaires that will help you determine the quotient of your smart building.

You can respond to questions with 'Yes, No or Partial' in the 'Survey' tab. The result will be displayed in 'Result' tab.

We as Persistent can guide and help you to make your building smart using IOT solutions.

Q.No.	IOT Questions	Category	Response Yes/Partial/No
1	Do you use any sensors or IoT enabled devices in your campus?	Technical	
2	Do you use any cloud based solutions for your campus management	Technical	
3	In your campus, do you have integrated technical system to control essential amenities such as lighting, HVAC, air quality, energy consumption, lifts, and safety?	Building	
4	Do you have basic way-finding and internal routing in your building?	Building	

5	Do you have smart cameras for security with cloud storage where the feed could be analyzed or remotely controlled from multiple location monitor?	Building	
6	In the event of a fire or break-in, does your building accept the necessary responses that are automatically triggered?	Building	
7	Do you have the feature where heating, lighting, and other facilities become responsive to current requirements and occupancy levels?	Building	
8	Do you work smartly by using real-time data to verify the equipment's output level and automatically set up maintenance?	Building	
9	Do you have auto contact tracing notifications?	Building	
10	Is Conference room occupancy tracked?	Conference Rooms/Workspace	
11	Any room, number of people allowed(capacity) smartly checked?	Conference Rooms/Workspace	
12	Does unused room get release from booking?	Conference Rooms/Workspace	
13	Does it inform other members that conference room is occupied?	Conference Rooms/Workspace	
14	Do you have the smart lobby arrival system to reduce the time spent in the formalities?	Lobby Arrival	
15	Is your reception being IOT based?	Lobby Arrival	
16	Do you know your employee's attendance?	Lobby Arrival	

17	Do you have automated goods handling (Luggage Handling Locker)?	Lobby Arrival	
18	Do you know how much food consumed in cafeteria on the go?	Cafeteria	
19	Are you able to check occupancy level of cafeteria to avoid crowding?	Cafeteria	
20	Do you have the smart irrigation system for your fields/garden?	Miscellaneous	
21	Does your premise have auto cab booking?	Miscellaneous	
22	Do you have the car park monitoring system in your company?	Miscellaneous
